HARRIS SEEDS

WHOLESALE PRICE LIST

FOR MARKET GARDENERS
AND FLORISTS

1940

IMPERIAL 44
The Best "Iceberg" Lettuce for
muck and upland. The photos
are of crops raised by some
of our customers last summer.
See also page 17.

JOSEPH HARRIS CO., INC.
Moreton Farm • Rochester, N. Y.

Please note our new mail address
MORETON FARM, ROCHESTER, N. Y.

We have not moved, and are located where we have always been on Moreton Farm at Coldwater, about 5 miles west of Rochester; but in order to give quicker, more efficient service we have changed our Post Office from Coldwater to **Rochester, N. Y.**

This change will save time both on our incoming and outgoing mail, thus giving our customers even better service than we have been able to heretofore.

During this change mail addressed to either Coldwater or Rochester will reach us thru the Rochester postoffice with equal quickness.

DELIVERY OF SEEDS

All vegetable and flower seeds **in this price list** except **Peas, Beans, Sweet Corn and Spinach** will be sent prepaid by parcel post, express or freight **at our option.**

Peas, Beans, Sweet Corn and Spinach will not be sent prepaid unless they are included in any one order **to the value of \$20.00 or more.**

The above offer to pay transportation does not apply to Field and Grass seed, Potatoes, Onion Sets, Fertilizers, etc. Articles other than seeds listed in this catalogue are sent at **purchaser's expense** except where they are quoted "**Transportation paid.**"

Seeds ordered sent by express will be so sent at the purchaser's expense.

About Ordering, Shipping, Etc.

Orders may be sent at any time and goods will be shipped at the time specified on the order.

Freight shipments are now handled by the railroads much more promptly than formerly and we advise having all heavy shipments (100 lbs. or more) sent in that way.

When ordering seeds shipped by freight or express please **be sure to give the name of your nearest freight railroad station or express office if it is different from your post office address.**

25% of the value of the order must accompany all orders for goods shipped C. O. D. Plants will not be sent C. O. D.

Terms and Discounts

Our regular terms are **cash with order.** When cash is sent with order we allow a discount of 5% on vegetable and flower seeds and plants, small fruits and accessories.

Field and Grass Seeds are strictly net cash with order at prices quoted.

To gardeners of established credit and those who furnish us with satisfactory references we allow the following **time payments except on field and grass seeds, which are strictly cash with order.**

Bills for seeds, plants, etc., shipped after January 1st are due and payable **net** August 1st.

Bills for goods shipped after August 1 are due **net** December 1st.

Conditions of Sale

No **seeds** are sold by us that we do not **know** are of good vitality and will grow under normal conditions. They are all tested and the per cent that germinates is marked on the package or label.

We assume responsibility of the seeds, plants and bulbs reaching the purchaser in good condition. However, in common with all responsible seedsmen, we give no warranty, express or implied as to description, quality, productiveness or any other matter of any seeds, plants or bulbs we send out, and we will not be in any way responsible for the crop. We will not accept or fill orders under any other conditions.

Moreton Farm, Rochester, N. Y., Dec. 1, 1939

JOSEPH HARRIS COMPANY, INC.

Our General Retail Catalogue

Our general retail catalogue is issued in January. It contains more complete descriptions of the varieties listed here. Also a full line of garden accessories, fertilizers, insecticides, etc.

Your copy will be mailed to you as soon as issued. If you do not receive it, let us know. We will gladly send copies to your friends on request.

JOSEPH HARRIS CO., Inc.

Remittance may be sent by Check, Draft, P. O. Order, Express Money Order or Registered Letter. Amounts under \$1.00 may be sent in Postage Stamps. It is not safe to send silver.

HARRIS SEEDS

1940 - Wholesale Price List for Market Gardeners and Florists

Selecting Imperial 44 Lettuce on Moreton Farm Last Summer

We grew the stock seed for our 1940 seed crop from these carefully selected fully developed heads. Selection under our Eastern conditions will maintain the fine qualities of this new "Iceberg" for the East.

NORTHERN GROWN SEEDS

Scientific breeding and careful selection combined with our short growing seasons here in the North have produced early, vigorous, high yielding strains of vegetables and flowers which have proved much superior to the same kinds raised further South. We have been growing vegetable, flower and farm seeds here on Moreton Farm for over 60 years. We wish to call attention to:

Harris' Special Crosby's Egyptian and Detroit Dark Red Beets

Harris' Ballhead Cabbage

Northern Cross Sweet Corn (Hybrid)

Harris' Perfection Cucumber, and Double Yield Pickle

Market King, Benders Surprise and Delicious Muskmelons

Model Parsnips

Harris' Famous Early Strains of Peppers (See page 24)

Blue Hubbard Squash and Quality Squash

Rutgers and all our other New York State Certified Tomatoes.

These are but a few of the numerous kinds which we have developed and grow for seed here on our own farms, that are described in this catalogue. We are not boasting when we say that the use of these and our other Northern Grown seeds have contributed a great deal toward the success of many leading Market Gardeners.

ORDER BY MAIL

It is so easy and you can be assured that when you send us your order you do not have to wait for your seeds. During the shipping season, orders are shipped out promptly on arrival. Fast mail, express and freight service will get them to you quickly and in good order.

EVERY LOT OF SEED IS TESTED!

The germination is plainly marked on every package of seed we sell. Use this guide when sowing to get good stands.

PLEASE NOTE: *We do not sell to Dealers.* The prices quoted in this list apply only to orders from market gardeners, florists and institutions who use seed in considerable quantities. *All prices here quoted are subject to change without notice and to our stocks being unsold.*

For prices of seed in quantities less than listed here, please refer to our general catalogue.

We will be pleased to quote special prices to anyone buying larger quantities of any one variety than we list here. Please write.

*Spargel (Ger.)***ASPARAGUS***Sparagio (It.)***Mary Washington—Large, early and “rust resistant”**

The best of the “rust resistant” varieties. Originated by the United States Department of Agriculture at Washington. Our seed is the true strain and will produce the finest large stalks. Oz. 15c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.25; 10 lbs. \$11.50.

*Artischoke (Ger.)***ARTICHOKE***Carciofo (It.)*

LARGE GREEN GLOBE. The Standard Variety. Produces the flower buds which are used for food the second year after sowing the seed. The plants are not hardy and require protection in winter north of Virginia. Oz. 45c; $\frac{1}{4}$ lb. \$1.20; 1 lb. \$4.00.

*Bohnen (Ger.)***BEANS***Fagioli (It.)*

One pound of beans will plant 150 ft. of row. 60 to 75 lbs. per acre.

At the prices here quoted, beans are not prepaid. Purchaser pays transportation on beans, except as follows: *If your order for vegetable seed including beans amounts to \$20.00 or more we prepay freight charges. (See also inside front cover.)

Our beans are grown from clean, true, high yielding stocks which are carefully rogued in the fields and hand picked. Our first consideration is to supply our customers with the best beans obtainable. We have made our prices as low as possible for our high quality stock.

Sure Crop Wax—The Best Flat Wax Bean

If your trade demands a *flat* wax or yellow bean, grow our strain of Sure Crop. It is fully equal to any and much superior to most stocks offered. The vigorous healthy upright growth and enormous yields of long straight pods make this one of the most popular and profitable wax beans. See prices below.

Pencil Pod Black Wax—The Best Round Podded Wax Bean

This is the bean to grow if your trade wants a round pod wax variety. Grown from carefully bred stock seed, which has been especially selected for vigor, high yield and true type. Growers in all sections have been highly pleased with our stock. See prices below.

Dwarf Wax Varieties

25 lbs. or more of one variety of beans will be supplied at the 100 lb. price. A bushel weighs 60 lbs.

NOT PREPAID* (See above)

	1 lb.	7 $\frac{1}{2}$ lb.	15 lb.	100 lb.	500 lb.
PENCIL POD BLACK WAX. See above.....	\$.25	\$1.45	\$2.55	\$14.00	\$65.00
ROUND POD KIDNEY WAX or Brittle Wax.....	.30	1.65	3.00	17.00
Pods 5 to 6 in. long, straight, round, clear yellow, stringless and medium early.					
STRINGLESS DAVIS WHITE WAX. White Seeded..	.30	1.50	2.70	15.00	70.00
Long straight, entirely stringless, flat yellow pods borne in great abundance on sturdy upright plants. Matures with Sure Crop.					
SURE CROP WAX. The Best Flat Wax Bean. See above..	.25	1.45	2.55	14.00
UNRIVALLED WAX. For Early Market.....	.25	1.45	2.55	14.00	65.00
A heavy yielder of attractive narrow, flat, clear yellow pods of refined appearance. A few days earlier than Sure Crop.					
WEBBER WAX or “Wonder Wax.” The Earliest Wax...	.25	1.45	2.55	14.00	65.00
Long, straight, flat stringless pods. Quite free from rust and a heavy bearer. Also called “Cracker Jack.”					

French Horticultural Beans from our Seed Crop

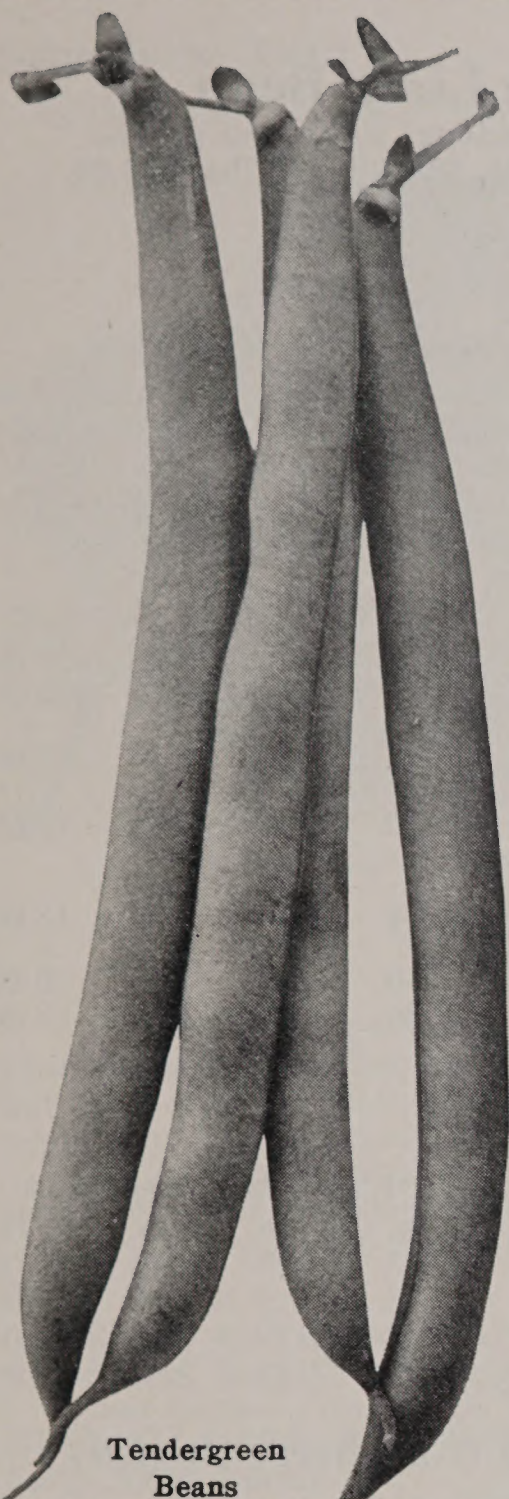

French Horticultural**Harris' Special Stock**

When we say that no finer stock of this variety can be obtained it is not boasting but a plain statement of fact that has been amply demonstrated. Particular growers find it superior to any stock sold, and fully equal to the finest of the jealously guarded “private stocks.”

This is a pure line strain which we have increased from a single plant that we selected in 1928. This stock is outstanding for its uniform long pods, superb coloring and high yield.

You can't go wrong on Harris' Special Stock of French Horticulture.

See prices on next page.

Tendergreen Beans

TENDERGREEN

The Leading Round Pod Green Bean

If you want an early round podded green bean you will do well to grow Harris' Strain of Tendergreen. This stock of Tendergreen has become so popular with our customers during the past few years, that now it has become one of our largest sellers.

The pods are handsome and straight; entirely stringless with tender rich meat and produced in great abundance on sturdy upright vines. See prices below.

BOUNTIFUL

The Most Profitable Green Bean to Grow

There is no better stock of Bountiful Beans obtainable than our special Northern Grown seed. It is grown from carefully selected high yielding foundation stocks in *disease free fields*. The pods are ready *early* and are handsome, light green, straight and flat and entirely stringless. See prices below.

PLENTIFUL (New)

A very attractive new long straight flat podded bean similar to Bountiful. The pods are a little longer, and mature a few days later. The beans are stringless and of fine quality. The vines are upright, robust and produce enormous crops. We recommend that you try some of this new kind. Black Seeded. See prices below.

Dwarf Green-Podded Beans

25 lbs. or more of one variety of beans will be supplied at 100 lb. price. A bushel of beans weighs 60 lbs.

NOT PREPAID* (See page 2)

	1 lb.	7½ lb.	15 lb.	100 lb.	500 lb.
BOUNTIFUL. Selected Stock. See above.....	\$.25	\$1.35	\$2.40	\$13.00	\$60.00
BLACK VALENTINE.25	1.35	2.40	13.00	60.00
A profitable market bean, produces large crops of long, round, straight, light green pods. Not stringless except when very young.					
FRENCH HORTICULTURAL. Special Stock. See page 2..	.30	1.90	3.45	20.00	95.00
French Horticultural. Not our own growing25	1.60	2.85	16.00	75.00
Giant Stringless Green Pod.25	1.35	2.40	13.00	60.00
Slightly curved, round pods, stringless of excellent quality.					
Lowe's Champion.30	1.60	2.85	16.00
One of the Horticultural or Cranberry beans. Pods 5 in. long, flat, green, straight and entirely stringless.					
PLENTIFUL. (New) See above30	1.60	2.85	16.00
Ruby Dwarf Horticultural. Also called "Roman" Beans.30	1.60	2.85	16.00	75.00
Used for shelling green. Pods light green splashed with deep red.					
STRINGLESS BLACK VALENTINE (Asgrow)25	1.35	2.40	13.00	60.00
One of the most prolific and earliest green beans. The pods are long, straight, nearly round when young and very attractive. One of the best market beans and a very profitable variety to grow.					
TENDERGREEN. Early and Prolific. Round Pod. See above	.25	1.35	2.40	13.00	60.00

LIMA BEANS

A pound of Dwarf Lima seed will plant 150 ft. of row. About 60 lbs. per acre.

Fordhook Bush Lima—The Most Profitable Lima Bean to Grow

We are pleased to continue to offer this very superior stock which has proved so popular among growers. The vines are very prolific and the pods uniformly large with choice thick green beans.

With this sure bearing stock, Lima Beans are a profitable crop to grow. See price below.

NOT PREPAID* (See page 2)

	1 lb.	7½ lb.	15 lb.	100 lb.	500 lb.
Burpee's IMPROVED Bush Lima	\$.30	\$1.65	\$3.00	\$17.00	\$80.00
Larger pods, thicker, deeper green beans than the old variety.					
FORDHOOK BUSH LIMA. Best for Market. See above..	.30	1.75	3.15	18.00	85.00
Henderson's Bush Lima.30	1.50	2.70	15.00	70.00
Small flat pods and beans, early and very prolific.					

BEANS continued on next page.

BEANS—*Continued***IDEAL or Mammoth Podded Pole Lima Bean**

This is the largest and best pole lima. Pods often eight inches long. Early and prolific.
Not Prepaid.* 1 Lb. 30c; 7½ lbs. \$1.75; 15 lbs. \$3.15; 100 lbs. \$18.00; 500 lbs. \$85.00.

POLE BEANS

A pound of Pole Bean seed will plant 120 ft. of row or about 100 hills.

King Horticultural—Harris' Special Large Seeded Strain

This variety is superior to French Horticultural both for yield and disease resistance. The pods are about an inch shorter and slightly wider than French Horticultural, straight and entirely stringless; very attractive, being heavily splashed with bright scarlet at the shell stage.

When put on good, well drained land, they can be grown just as well without supports. The pods grow just as long and straight and they can be picked as easily as the dwarf kinds.

This large seeded strain is of our own growing. See price below.

	NOT PREPAID* (See Page 2)			
	1 lb.	7½ lb.	15 lb.	100 lb.
Golden Cluster Wax.....	\$.30	\$1.90	\$3.45	\$20.00
Long, broad, deep yellow pods of finest quality; beans white.				
Kentucky Wonder. Also called "Old Homestead".....	.30	1.50	2.70	15.00
Long, slender, green pods of fine quality. Early and very prolific.				
KENTUCKY WONDER. (White Seed) Heavy Yielding.....	.30	1.75	3.15	18.00
This is the most uniform and prolific strain of Kentucky Wonder. Long slender pods. Has the added advantage of being white seeded.				
Kentucky Wonder Wax.....	.30	1.50	2.70	15.00
Long, flat, yellow pods of fine quality. One of the best wax pole beans.				
KING HORTICULTURAL. Special Large Seeded Strain. See above.....	.30	1.90	3.45	20.00
SCOTIA. Fine for Roadside Markets.....	.30	1.75	3.15	18.00
Extremely prolific, with long round slender green pods of the finest quality. Has proved very profitable as a high quality bean for discriminating trade.				

FIELD BEANS

Sow about 60 lbs. of Field Beans per acre.

	NOT PREPAID* (See Page 2)			
	1 lb.	7½ lb.	15 lb.	100 lb.

RED KIDNEY.....	.25	1.15	2.05	9.00
Robust Pea Beans. Mosaic Resistant.....	.25	1.10	1.60	7.00
White Kidney.....	.25	1.45	2.55	14.00

BROCCOLI—True Italian Green Sprouting (Calabrese Strain)

1 oz. of seed will produce about 2000 plants.

This is the true "Calabrese" strain and is the best stock which can be obtained. You can depend on this stock to produce compact center heads and an abundance of large side shoots.

Oz. 50c; ¼ lb. \$1.35; 1 lb. \$4.50.

BRUSSELS SPROUTS

Rosenkohl (Ger.)

Cavolo di Brussels (It.)

1 oz. of seed will produce about 3000 plants.

Brussels Sprouts are not difficult to grow and as there is always a market for good sprouts. The thing to do is to grow the right kind. We offer the finest stocks available.

Long Island Improved—Private Stock

This is the most uniform and heaviest producing stock of this popular variety to be had. The plants are dwarf and covered with firm sprouts of the best type and size.

We cannot recommend this stock too highly.

Oz. 75c; ¼ lb. \$2.35; 1 lb. \$8.00.

Fancy Basket (New)—Early and Prolific

This is a new variety of the tall type that has produced excellent results in some sections.

It is the earliest variety we know. The stalks are fully two feet tall, closely covered with large firm sprouts.

Oz. 75c; ¼ lb. \$2.35; 1 lb. \$8.00.

Hot Water Treated Seed

We can supply hot water treated seed of Broccoli and Brussels Sprouts at no advance in cost. Hot water treated seed is usually a little lower in germination. We will supply untreated seed on all orders unless hot water treated seed is specifically requested.

Long Island Improved. Private Stock.

Salat-Ruebe (Ger.)

BEETS

Barbabetole (It.)

$\frac{1}{4}$ lb. of seed will sow about 250 ft. of row. Sow 10 lbs. of seed to the acre for rows 14 in. apart;
6 to 8 lbs. per acre for rows 18 in. apart.

Harris' Special Crosby's Egyptian Beets

Harris' Special CROSBY'S EGYPTIAN BEET

Finest For Early Bunching

This is without question an outstanding stock of this variety. It is superior to any stock we know. Harris' Crosby is very early, producing handsome dark red beets with small tap roots and a smoothness and uniform shape which makes them invariably the finest looking beets in the market.

We are proud of our stock of this grand beet. It is backed by over thirty years of careful breeding here on our own farm and is as we have said many times, "Every one a model for shape and color." See prices below.

Harris' Special Detroit Dark Red Famous For Fine Color

The best beet for late summer and fall trade. No better strain can be obtained. Through many years of careful breeding and selection we have produced a beet that is not only of excellent shape but has a superb deep red color which is without equal. There is no beet quite so satisfactory in all respects as Harris' Special Detroit Dark Red.

Our stock is particularly well liked by canners. We know canners who insist on Detroit beets grown from our seed in preference to all others.

Our seed crops of this beet this year have produced fine seed of high germination. See prices below.

	$\frac{1}{4}$ lb.	1 lb.	10 lb.	100 lb.
CROSBY'S EGYPTIAN. Harris' Special Strain. See above.....	\$.25	\$.85	\$ 7.75	\$ 70.00
CROSBY'S EGYPTIAN. Bright Red Strain.....	.25	.70	6.50	60.00
Color lighter red than Harris' Strain. Popular in some markets.				
DETROIT DARK RED. Harris' Special Strain. See above.....	.25	.85	7.75	70.00
Early Blood Turnip.....	.25	.65	6.00	55.00
A good old variety. Large, somewhat flattened beets. An early cropper.				
EARLY WONDER. A Superior Strain for Bunching.....	.25	.85	7.75	70.00
Quite similar to our special strain of Crosby's Egyptian. Early and of good deep red color. Our strain of this variety is exceptionally fine.				
LONG SEASON. Called "Winter Keeper" and "New Century"....	.45	1.40	13.50	125.00
A very late variety of extra fine quality. Description in Retail Catalogue.				
LONG SMOOTH BLOOD RED. (True Strain).....	.25	.75	7.00	65.00
8 to 10 inches long and very dark red. Grows half out of the ground.				
Beets for Greens. (Green Top).....	.15	.45	4.00	35.00
Quick growing large tops, for greens.				

"I have been buying your seeds for nine years. They have proved the best seeds I have ever planted. I also have planted seeds from all the best seed houses, but Harris' have proved the best and mature the earliest and finest crops."

C. S. Galliher, Curwensville, Pa. Jan. 30, 1939.

MANGELS and SUGAR BEETS—For Stock

Six to eight pounds of seed will sow an acre.

See our general catalogue for complete descriptions.

DANISH YELLOW GIANT (Sludstrup). The Heaviest Yields.

Golden Tankard. Deep yellow flesh.

MAMMOTH LONG RED. Most Popular Kind.

NEW "HALF SUGAR" MANGEL. Rich in Sugar.

Price of any of above varieties:

$\frac{1}{4}$ lb. 15c; 1 lb. 45c; 10 lb. \$4.00.

Swiss Chard or Spinach Beet. See page 27.

Irwin Wickham of Stanley, N. Y. and Joe Harris. Both seem pleased with Mr. Wickham's crop of Harris' Detroit Dark Red Beets.

Kraut (Ger.) CABBAGE*Cavolo capucci (It.)*

One ounce of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames.

NOW!

All the Cabbage Seed we offer is

HOT WATER TREATED

This is a most important step in the control of Black-Leg.

Added work for us, but **Insurance** for you!

Golden Acre**The Earliest Cabbage**

This is the best early market cabbage and one of the most profitable kinds to grow. Our seed of this popular round head variety is the true originator's strain which we have sold for years and is vastly superior to most stocks sold even at higher prices. See prices below.

Golden Acre Special**Best Strain of Golden Acre Obtainable**

An extra selected stock which we can strongly recommend to the grower who wants absolutely the best and is willing to pay the little extra cost for seed. It actually amounts to only about 75c per acre. See prices below.

Green Acre (New)

Remarkable for the inherent green leaf color through the heads giving them a "freshly cut" appearance, even after much shipping, handling and trimming.

The heads resemble Golden Acre, but are larger, greener and mature a few days later. The plant is short stem and compact. This new cabbage has proved a most profitable kind to grow. Try some this year. See prices below.

Yellows Resistant Copenhagen

Yellows Resistant Cabbage

An increasing number of farms each year are showing "yellows sick" soil. Yellows resistant varieties are the only kinds to grow where ground is badly infected with yellows. In many sections where there is slight yellows infection the ordinary varieties can be grown, but the resistant kinds usually do much better and produce larger crops.

We sell the following yellows resistant strains. These are the best stocks obtainable.

Yellows Resistant Golden Acre

Yellows Resistant Copenhagen

Marion Market (Copenhagen type)

Yellows Resistant All Seasons

Wisconsin Hollander (Ballhead)

Bugner Yellows Resistant (Danish)

If you have yellows on your farm, be sure to grow these varieties!

Early and Medium Early Varieties

	Oz.	1/4 lb.	lb.
COPENHAGEN MARKET. True Large Headed Stock.	\$.30	\$.90	\$3.00
Our strain is larger and more uniform than usual strains of this variety. Heads round, hard and have few outside leaves. Larger and about 10 days later than Golden Acre.			
COPENHAGEN MARKET. Yellows Resistant. The Best Stock.45	1.20	4.00
So much better than those which have heretofore been offered that there is no comparison. The heads are very uniform for shape and size and about the size of our strain of regular Copenhagen Market but mature a little later.			
Early Jersey Wakefield. Early Pointed Heads.30	.90	3.00
Our strain is particularly fine, the heads being very uniform and early.			
ENKHUIZEN GLORY.25	.70	2.25
A very large, medium early strain. Heads as large as the late kinds and mature much earlier. Has proved to be a most profitable variety for market and kraut.			
GOLDEN ACRE. The Earliest Cabbage. See above.35	1.10	3.50
GOLDEN ACRE. Special Strain. See above.60	1.90	6.50
GOLDEN ACRE. Yellows Resistant.50	1.50	5.00
True to type and earliness and in addition will produce good crops on diseased soil where regular Golden Acre cannot do well.			
LARGE LATE COPENHAGEN. Best for Kraut.30	.85	2.75
Enormous yielder. Two weeks later than Copenhagen Market. Can be cut for market or kraut. Remains hard without splitting a longer time than any other kind we have seen. Grows 10-12 in. in diameter.			
MARION MARKET. Yellows Resistant. Copenhagen Type45	1.20	4.00
We have a very uniform true stock of this variety.			
GREEN ACRE. See above.50	1.50	5.00
RED ACRE. New Early Round Red. Sure Heading.45	1.20	4.00
The earliest red cabbage, only a little later than Copenhagen Market. Resembles Golden Acre in shape and size. Very uniform and solid and deep red color. <i>Every head is just alike.</i> Plants are compact, and even under adverse conditions practically every plant makes a good head.			

CABBAGE continued on next page.

HARRIS' BALLHEAD

The Outstanding Danish Cabbage

We have yet to see a stock of Danish Cabbage which is superior to Harris' Ballhead.

It is very uniform, extremely solid and just the right size for market and shipping, averaging about five to six lbs. in weight. The vigor and great uniformity of this strain year in and year out make it the most consistent heavy yielder of fine cabbage. In addition it has proved to be a very superior keeper, coming out of storage in excellent shape.

The heads are greener than most Danish cabbage with a slight purple tinge. Because of the attractive appearance, uniform size and firmness, this cabbage commands the best prices and often sells readily when the market is slow. If you want good Danish cabbage, grow Harris' Ballhead. See prices below.

"I am sending two snaps of my cabbage fields. The plants were set the 18th of June and these snaps were taken August 15th. I began to cut the first of September at a dollar a box. It is the most profitable piece of cabbage I ever grew and I have grown cabbage for 25 years. . . . The seed used was your Harris' Ballhead, the outstanding Danish cabbage."

Arthur E. Dodge, Southbridge, Mass., Oct. 9, 1939

Joe Harris in one of our fields of Harris' Ballhead

Late or Main Crop Varieties

	Oz.	¼ lb.	lb.
ALL SEASONS. Yellows Resistant	\$.45	\$1.20	\$4.00
Especially recommended for "Yellows sick" soil where the large semi-flat domestic type for kraut etc. is wanted. Very highly resistant.			
BUGNER. Yellows Resistant45	1.20	4.00
Because it is yellows resistant, this old variety is becoming more in demand. It is later than Danish Ballhead, and has larger and more flattened heads. A very heavy producer.			
DANISH BALLHEAD. Intermediate. "Fine Keeper"30	.85	2.75
Heads are deeper and not as flattened as the short stemmed. The color is deeper green and they keep very well in storage. A profitable type to raise.			
DANISH BALLHEAD. Short Stem. Heavy yielding strain30	.85	2.75
This is a very fine strain producing large yields of uniform heads which are medium large, solid and of good color. An excellent variety for storage.			
HARRIS BALLHEAD. See above40	1.15	3.75
MIDSEASON MARKET30	.90	3.00
One of the most uniform and heaviest yielding of the early midseason varieties. Heads are large, almost perfectly round and solid. Excellent for market, kraut or shipping.			
PENN STATE Ballhead. True Stock30	.90	3.00
Short stemmed with very solid heads, which are somewhat flatter than most Danish types. This cabbage is noted for its large yield.			
Premium Flat Dutch25	.70	2.25
SAVOY. Perfection Drumhead30	.90	3.00
Heads are large, of fine quality and quite firm. The leaves are deep green, and very much curled. Matures late and keeps all winter.			
SUPER CURLED SAVOY. The Best Stock50	1.50	5.00
Finest Market Gardeners Strain. Fine heads, more savoyed, earlier and more compact plants than above. This is the most uniform stock we have ever seen.			
WISCONSIN HOLLANDER. "Yellows" Resistant45	1.20	4.00
The best "yellows" resistant Danish type. Under normal conditions will produce fine crops on "yellows sick" soil where ordinary Danish cabbage will not survive.			
MAMMOTH ROCK RED. Sure Heading Strain30	.90	3.00
The largest red cabbage. The heads are hard, medium round and deep red. This is the best late red kind for market or shipping.			

Chihli

Chihli—Chinese Cabbage

Much the Best Variety. This is the most popular kind and best for market and roadside stands. It has almost entirely replaced all other kinds. The heads are very attractive, often 18 in. long, uniform in shape and size, hard and firm. This variety is by far the best to grow. A profitable crop on muck.

Sow the seed in July or August, the crop matures in 8 to 10 weeks. 1 to 1½ lbs. will sow one acre.

Oz. 25c; ¼ lb. 75c; lb. \$2.50.

*Blumenkohl (Ger.)***CAULIFLOWER***Cavoloftore (It.)**One oz. of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames.***Snowball - Perfected Strain***Grown by Jay F. Wickham of Stamford, N. Y.***Harris' Cauliflower Seed**

For many years we have made it a point to supply our customers with the best possible cauliflower seed and at a reasonable price. We have made our prices as low as is consistent with good quality. You need pay no more to get the best.

Note: We can supply **hot water treated** cauliflower seed of the varieties and quantities listed in this catalogue at no increase in price. Hot water treated seed is usually a little lower in germination. *We will supply untreated seed unless treated seed is specifically requested.*

**Snowball Cauliflower
Perfected Strain*****"No better seed can be bought at any price"***

Our "Perfected Strain" is rapidly becoming the standard by which other stocks are judged. As our sales increase each year on this stock we are more and more convinced that there is no use paying more than we charge for Snowball Cauliflower.

The heads are unusually deep and heavy, of uniformly good size, beautifully white with a tight attractive curd. See price below.

**Super Snowball Cauliflower
True Originator's Stock**

A very early large heading kind. Under favorable conditions of soil and weather, it produces wonderfully fine crops, a majority of the heads being ready during a short period of time.

Cauliflower growers recognize the value of this fine variety and our customers have found that altho there are many strains now offered under a large number of names, our seed has never been surpassed.

It is grown by the originator, and is the same strain which we have sold customers since its introduction in 1929.

We strongly advise our customers not to take chances with their Super Snowball but to use this original strain which has proven so extremely satisfactory. See price below.

Snowdrift***Also called White Mountain and Improved Holland Erfurt***

Slightly earlier than Snowball, producing large firm heads which are very white. This variety is popular in many sections and is sold under a variety of names. Ours is an extremely fine true stock. See price below.

Early Purple Head—The Best Italian Purple Cauliflower

Without question this is the finest strain of Italian Purple Cauliflower. The plants produce tight, uniform, good size heads, fully two weeks earlier than other purple stocks. This year we started to cut in late September from plants set in the field June 23d.

This stock will produce a larger percentage of true purple heads than any other stock we have ever seen. See prices below.

	$\frac{1}{4}$ oz.	Oz.	$\frac{1}{4}$ lb.	lb.
Danish Giant Snowball or "Dry Weather"	\$.50	\$1.60	\$5.75	\$20.00
Ten days or two weeks later than Snowball. Stands drought.				
DANISH GLORY (NEW)75	2.25	8.00	30.00
This deeper heading selection of Super Snowball matures between that variety and Snowball Perfected Strain. The large firm heads are well covered. <i>This proved an exceptionally good cropper under a wide variety of conditions.</i>				
EARLY AMERICAN SNOWBALL (NEW)75	2.25	8.00	30.00
The earliest cauliflower we have ever seen producing large, fine tight heads, even under adverse conditions. It's well worth trying.				
ERFURT EARLY DWARF. Also called CATSKILL SNOWBALL45	1.50	5.15	18.00
Much like Snowball, but is later and has somewhat shorter stems. Ours is a true even stock and produces the finest heads.				
SNOWDRIFT. See above70	2.10	7.60	28.00
NEW EARLY PURPLE HEAD. Italian Purple. See above50	1.60	5.75	20.00
SNOWBALL. Perfected Strain. See above65	2.00	7.20	26.00

Carroten (Ger.)

CARROTS

Carota (It.)

An ounce will sow about 300 feet of row. It requires 2 to 4 lbs. of seed for an acre, depending on how far the rows are apart.

Nantes
Carrot

Nantes—Coreless

This is the attractive *coreless* variety that is used so much for early bunching as well as a topped carrot on many markets. The carrots are six to seven inches long, unusually smooth, nearly the same size the entire length and stump rooted. They are *entirely coreless* and of finest quality. See prices below.

Imperator—Outstanding for Bunching

This is the fine bunch carrot from California which is found on Eastern markets. It grows just as well here and has become very popular for high class bunching trade. The carrots are often eight inches long, smooth, somewhat tapering and deep orange in color. The tops are just right for bunching. We offer the true stock. See prices below.

Supreme Half-Long—An Excellent New Market Carrot

“A Red Cored Danvers”

This new carrot is really a more slender, refined, coreless strain of the Danvers type. The roots are good size, very attractive; of deep orange color and quite smooth. The carrots are solid deep orange, with a small “red” core. The tops are not too large, making this a fine carrot both for bunching and busheling. See prices below.

Morse's Bunching

Deep orange color, smooth, uniform appearance and good tops for tying make this a very popular bunching carrot in many sections. The carrots are eight inches long, slightly tapering with a stump root when fully mature. The deep orange color goes clear to the tip. See prices below.

Note: 25 lbs. or more of any one variety will be supplied at the 100 pound rate.

	$\frac{1}{4}$ lb.	lb.	10 lb.	100 lb.
CHANTENAY. Special Strain—Long.	\$.30	\$1.00	\$ 9.00	\$ 75.00
Grows about an inch longer than Red Cored and most other strains of Chantenay. It has proved the best stock of this variety we know.				
CHANTENAY. Red Cored30	1.00	9.00	75.00
Our customers have been well pleased with this stock. The fine quality of this carrot has made it rapidly replace the old style Chantenay both for market and canning. Our strain has been constantly improved and will be found to be practically 100% red cored.				
DANVERS HALF LONG. A Heavy Cropper30	1.00	9.00	75.00
We have a pure heavy yielding stock of this popular variety.				
HUTCHINSON. True New England Type60	2.00	19.00	175.00
Produces large roots 9 to 10 in. long, nearly the same size the whole length and stump-rooted. Color light orange. This carrot yields large crops and is used extensively as a topped carrot in the New England area. We have a very superior and dependable stock.				
IMPERATOR. Fine for Bunching. See above45	1.40	13.00	115.00
Mastodon or White Vosges25	.80	7.00	60.00
Large, white carrot for stock feeding. Immense yielder. 8 to 10 in. long.				
MORSE'S BUNCHING. (New) See above45	1.40	13.00	115.00
NANTES. Also called CORELESS. See above50	1.50	14.00	125.00
PERFECTION. A Longer “Coreless”55	1.75	16.50	145.00
This carrot is similar to “Coreless” described above, but is longer, being 7 to 8 inches long. They are practically the same size the whole length and <i>coreless</i> . Fine for fall bunching or topped carrots in fall and early winter.				
SUPREME HALF LONG. (New) See above40	1.30	11.50	100.00
TENDERSWEET. The Sweetest Carrot45	1.40	13.00	115.00
This carrot is being grown more and more for market. The roots are large, smooth and tapering, of striking deep orange color. They are a good bunching carrot and are of very superior quality.				

“This is the third season I have purchased my seed from you. I have found your seeds more satisfactory and true to germination than all I have purchased from various concerns in the past 20 years.”

Edw. E. Gardner, Michigan Center, Mich. Feb. 16., 1939.

Harris' Golden Plume
Grown by Wm. Trieu, Macedon, N. Y.

CELERY

Bleich-Sellerie (Ger.)

Sedano (It.)

An ounce of seed will produce about 8000 plants.
It requires 20,000 plants to the acre.

Golden Plume or Wonderful Original Strain

This is our original type of Golden Plume which has proved so satisfactory to our customers. The stalks are very large with remarkably heavy hearts and with thick solid stems. Crops which pack 4 doz. to a standard $\frac{2}{3}$ crate are not at all uncommon with this strain. There is not one green stalk in a thousand and seldom if ever soft ones.

Many of the best celery growers in the country get their seed of Golden Plume from us. They find that they can get best results without having to pay a fancy price for their seed. See prices below.

Supreme Golden (New)

An Improved Taller Golden Self Blanching

Definitely taller than our regular Golden Self Blanching and matures a few days earlier, also a little taller than Golden Plume and later. The plants grow very erect and are unusually compact and uniform. The stems are long to the first joint, broad and rather thick. The inner stems are long and the hearts exceptionally good. The whole plant is very compact, making a very solid crate when packed. The stems blanch to a clear creamy white. See prices below.

Two New Varieties of Celery

We urge our customers to plant the bulk of their land with the kinds which they have found to be most profitable, but by all means try a few rows of the new varieties when they are introduced. This year we are listing two new kinds, Masterpiece and Super Plume. They have proved to be outstanding in trials and merit your consideration. We urge you to try these this year.

Masterpiece (Early)

This is an early Golden or Self Blanching Celery of very superior quality. It is a tall variety with long (8 to 9 inch) broad, very thick stems with rounded edges. They are free from strings and of finest flavor. See prices below.

Super Plume

This is slightly earlier, similar in appearance and height to our regular Golden Plume. The stems however, are thicker, average longer and are of better quality. Stems usually 7 to 9 inches, firm and crisp. Blanches quickly but stands up well. See prices below.

Yellow or "Self-Blanching" Varieties

	Oz.	$\frac{1}{4}$ lb.	lb.
GOLDEN PASCAL. Of superb quality.....	\$.85	\$2.85	\$10.00
A tall growing celery of extremely fine quality. The stalks are thick, rounded and long, creamy yellow in color and very brittle and tender. Keeps well in storage.			
GOLDEN PLUME or WONDERFUL. Original Strain. See above.....	.75	2.35	8.00
GOLDEN PLUME. New Tall Strain.....	.75	2.35	8.00
Stems are longer to the first joint than the old strain. It is definitely a taller plant but not quite as large in diameter. Better suited for upland than muck.			
GOLDEN SELF-BLANCHING. "Old" Strain.....	.75	2.35	8.00
This old standard variety continues to be a very profitable strain to grow for late celery. The stalks are large with large heavy hearts and tall enough to nicely fill a standard celery crate.			
MASTERPIECE (NEW). See above.....	$\frac{1}{4}$ oz. 60c	2.00	7.00
SUPREME GOLDEN (NEW). New tall type. See above.....	$\frac{1}{4}$ oz. 40c	1.20	3.95
SUPER PLUME (NEW.) See above.....	$\frac{1}{4}$ oz. 40c	1.25	4.25
		15.00	

Green Varieties

EASY BLANCHING "Newark Market" or Sanford Superb.60	1.75	6.00
It has the same dwarf, compact habit of growth as Golden Self-Blanching, blanches quickly, and is of fine quality. Leaves are green and the stalks white when blanched. This is a very superior stock and will produce the finest early green celery.			
GIANT PASCAL. Special Strain.....	.50	1.50	5.00
This strain of Giant Pascal is largely used in New England and is considered one of the very best for late winter market. The stalks are large, solid and blanch pure white. Growers find our strain equal to those selling for several times the price we charge.			
SALT LAKE or UTAH. The Best Green Celery. See below.....	.75	2.35	8.00

Salt Lake or Utah—The Best Green Celery

Salt Lake is the best celery to use where a superior green kind is wanted for fall market and storage. Growers who have used our strain for nearly ten years are very enthusiastic in its praise. The plant grows to a good height with a well developed and heavy heart. The individual stalks are *very thick*, crisp, of high quality and blanch more quickly than other green varieties. They are firm, with practically never a soft stalk. See prices above.

CELERIAC—Turnip-Rooted or “Knob” Celery

	Oz.	$\frac{1}{4}$ lb.	lb.
LARGE SMOOTH PRAGUE. Best for Market.....	\$.25	\$.75	\$2.50
This is the standard market garden variety.			
DELICACY. Grow for fine quality.....	.30	.90	3.00
This variety produces medium size bulbs of superior quality.			

Welschkorn (Ger.)

SWEET CORN

Mais (It.)

One pound of seed will plant 350 to 400 hills; 10 to 12 lbs. will plant an acre. A bushel weighs 48 lbs.

Harris' Northern Grown Sweet Corn

We are large producers of the best market varieties of sweet corn seed. For many years we have made a specialty of growing both open pollinated and hybrid sweet corn seed of the finest quality here in the North on our own and nearby farms.

Combining scientific breeding and careful selection with the greatest care in growing, drying and cleaning, we produce seed corn of the highest standard of vitality and purity.

Hybrid Sweet Corn

The large number of hybrids now offered make it difficult for the grower to choose the best. Good hybrids can be produced only from carefully selected pure line parent stocks. In the growing of hybrid seed corn constant detasseling of the seed parent is absolutely necessary. Many seed fields of hybrid corn are detasseled only three or four times but we find that it is necessary to go carefully through each of our fields *twelve to fifteen* times. This is expensive work but it is the only way to grow first class hybrids.

Hybrid sweet corn cannot be saved for seed the next year as it breaks down.

Seneca “60”—The Earliest Hybrid

(65 days)

This new corn is the earliest *Hybrid* in production we know and one of the earliest varieties grown. In our trials it has been ready in 65 days and *we have seen it mature in sixty days.*

The stalks are 4 to 4½ feet tall, with golden ears about 6 inches long, eight rowed, and ripening a large part of the crop over a short period of time. We recommend this extra early hybrid highly. Not resistant to Stewart's Disease. See prices on page 13.

Northern Cross

An Early and Tremendous Yielding Hybrid (73 days)

This new corn is without doubt the best hybrid of the Whipple's Yellow type.

It is a hybrid of great vigor, producing fine stands of strong sturdy plants which seem to grow by leaps and bounds and produce great crops of large even ears. There are usually two and often three good ears to a plant. It is truly a tremendous yielder of fine large ears and is well suited to fill the gap between the extra early and later kinds.

These large ears are very uniform in size, fully eight inches long with 12-14 rows of bright yellow kernels and are very attractive in appearance and of exceptionally high quality.

Matures a few days before Whipple's Yellow and from 10 to 12 days earlier than Golden Cross Bantam.

Northern Cross is a product of our own breeding here in the North, being a cross between two of our own pure line inbreds and can be produced only by us. It is an outstanding market variety and we urge our customers to make a planting this year. See prices on page 13.

Caution: Northern Cross is not resistant to Stewart's Disease (wilt).

Northern Cross. Note the large uniform ears

“The Northern Cross Sweet Corn which I sent for last year was everything that your catalogue claimed it to be. I hope you will be able to fill my order this year as I like it as well as any sweet corn I've ever had.”

George Wattenbe, Clinton, N. Y. April 14, 1939.

SWEET CORN—*Continued*

Early Bancross 39

Early Bancross 39 (74 days)

This new crossed corn has proved a winner for growers who want a large uniform ear maturing before Golden Cross Bantam. They are practically the same size and shape and are ready fully *ten days earlier*.

The plant is rugged and prolific, with the majority of the plants producing two good ears. It is moderately resistant to Stewart's Disease (wilt), and has produced large early crops where other corn has failed entirely.

Our seed of this new hybrid has been produced under our careful supervision by a top cross of Purdue 39 on our own selected stock seed of Harris' Extra Early Bantam. This corn should be sown at the same rate as the open pollinated varieties. See prices on next page.

Golden Cross Bantam***Wilt Resistant—High Yielding******Uniformly Large Ears (84 days)***

Among sweet corn growers it is no longer a question of whether or not to grow Golden Cross Bantam but where to get the best stock. The demand for this corn has been so great that many inferior stocks are being offered. Growers should be particularly careful to get their seed from reliable sources. You can depend on our stock. It is outstanding for uniformity and high yield. Every pound was grown here in Western New York from tested pure line parents and the crop was thoroughly detasseled.

This stock will produce large crop of beautiful ears of remarkably uniform length (about 8") and mostly with 12 rows of bright golden yellow kernels of superior quality. They mature about a week later than Golden Bantam, the whole crop ripening at nearly the same time.

Sow not more than six pounds per acre.

See prices on next page.

Ioana***Large Eared—Midseason—Wilt Resistant Hybrid (88 days)***

This new hybrid corn was developed by Dr. E. S. Haber of the Iowa State College. It will be welcomed by sweet corn growers who want a good large eared variety to follow Golden Cross Bantam. The ears are large, slightly tapering, mostly 8 to 9 inches long with 12 to 14 rows (a few 16) of creamy yellow, medium deep kernels, which fill the ear well at the tip.

These large attractive ears are of fine quality being sweet and tender. The plant is tall and strong and is *resistant to Stewart's Disease (wilt)*.

We consider this to be the outstanding new sweet corn, and a worthy addition to our carefully chosen list of hybrid corns. Be sure to try some this year. See prices on next page.

Golden Early Market (Gill's)—Grow for Extra Early Large Ears (67 days)

Has become the most popular early variety because when true seed is used it produces large attractive ears very early and thus commands the highest prices. *It is important to get true seed.*

We obtained our stock from the originators and have grown and improved it here in the North for the past seven years. You can depend on the Harris' stock of Golden Early Market to produce early crops of uniformly large fine ears. See prices on next page.

Harris' Extra Early Bantam—The Heaviest Yielding Extra Early Sort (68 days)

Since we introduced this corn in 1927 it has proved one of the most profitable varieties for the grower ever offered. In spite of the growing demand for larger ears in some markets, many growers find that because of the earliness, large yield and superior quality, Harris' Extra Early Bantam is still on their "must grow" list. It is not only an extremely heavy yielder but is one of the earliest varieties, maturing ears which can be sold at high prices before the market becomes flooded.

The ears resemble true Golden Bantam in size and shape and high quality but mature ten days earlier. They are up to 7" long with 8 to 10 rows of golden yellow kernels, very uniform in size and appearance and of fine quality. See prices on next page.

"I am a truck gardener and have raised it (Extra Early Bantam) for several years. It has given us a splendid return each year." C. L. Paine, Westmoreland Depot, N. H. May 17, 1939.

Whipple's Yellow

Harris' Original Northern Grown Stock—(77 days)

We are the *original* introducers of Whipple's Yellow Corn and since its introduction in 1920 we have constantly bred and selected it for earliness, uniformity of size and high yield.

We have seen many other stocks of Whipple's Yellow grown in comparison with our own, and without exception ours stands head and shoulders above all the rest. *You cannot afford to grow just an ordinary strain of this fine corn.*

Every pound of this variety which we sell is grown here in the North, on or near our own farm under our supervision from our own carefully bred stock seed. See prices below.

When Different Varieties Mature

We give after the names of the different varieties listed in this catalogue the approximate number of days in which the corn matured in our trials which were planted about the middle of May. As the time required varies greatly according to the weather, time of planting, and fertility of the soil the figures should be regarded as relative rather than actual.

SWEET CORN—Yellow Varieties

Note: 25 lbs. or more of any one variety will be supplied at the 100 pound rate.

*At the prices here quoted, sweet corn is not prepaid. Purchaser pays transportation on sweet corn except as follows: If your order for vegetable seeds, including corn, amounts to \$20.00 or more we will prepay the FREIGHT charges. Write for special prices on larger lots than quoted here.

	NOT PREPAID*			
	1 lb.	6 lb.	12 lb.	100 lb.
BANTAM EVERGREEN. (86 days)	\$.25	\$1.15	\$2.05	\$14.00
One of the best late yellow corns. Ears large, better than most stocks grown. Straight rowed and fine quality.				
BUTTERCUP. Noted for Quality. (80 days)25	1.15	2.05	14.00
A larger, improved Golden Bantam. The long slender ears always command a premium on markets. A very superior stock of our own breeding.				
CANADA GOLD. Early Long Ears. (70 days)25	1.15	2.05	14.00
Only a few days later than Golden Early Market with ears 8 to 9 in. long with 8 to 12 rows of deep butter yellow kernels of fine quality. The plant is strong and sturdy often producing two good ears. This variety is well liked by many sweet corn growers.				
EARLY BANCROSS 39. New Early Hybrid. (74 days) See page 12.35	1.95	3.70	28.00
GOLDEN BANTAM. True Strain (80 days)25	1.15	2.05	14.00
Small, medium early, kernels yellow and of fine quality. Our stock is carefully bred to the true original 8 row type and is far superior to most.				
Golden Country Gentleman. Grow for quality. (88 days)25	1.25	2.30	16.00
The large attractive ears and superb quality make this a fine corn for late market and roadside sales. The kernels are irregular like the old white variety but deep golden in color. One of the sweetest varieties grown.				
GOLDEN CROSS BANTAM. Wilt Resistant. Hybrid. (84 days)35	2.00	3.85	29.00
See page 12.				
GOLDEN EARLY MARKET (Gill's) (67 days) same as Golden Hummer and Extra Early Yellow. See page 12.25	1.20	2.15	15.00

Large yellow kernels, the most popular in many markets.					
JAPANESE HULLESS30	1.45	2.55	8.40	14.00
The earliest kind. Small white kernels.					

*Gurken (Ger.)***CUCUMBERS***Cetriolo (It.)*

$\frac{1}{4}$ lb. of seed will plant about 300 hills or 200 ft. of row. It requires about 2 lbs. per acre in hills or 3 to 4 lbs. drilled.

Harris'
Perfection
Cucumber

Harris' Perfection**The Grandest Long Green White Spine**

If you want the finest long white spine cucumbers, grow Harris' Perfection.

The fruit is straight, smooth and handsome, deep green in color with small white rays at the blossom end. It retains this deep green color for a long time after picking. The cucumbers will average well over eight inches long when ready for market and are just the right thickness.

Since we introduced Harris' Perfection in 1916, we have kept the stock under our entire control, working constantly to improve the type, yield and uniformity. Even though there have been several very fine varieties of this type introduced in the past few years, many of our customers still prefer Harris' Perfection because it commands a premium over other kinds.

This variety is adapted for dill pickles as well as for general market. See prices below.

Straight Eight—A Very Prolific Long White Spine

This new variety has become very popular among growers because of the large yield of fine straight cucumbers. When ready for market the cucumbers are 8 to 9 inches long, straight and smooth. The color is medium dark green with green rays at the blossom end. We can recommend Straight Eight for a money making crop. See prices on next page.

A & C Cucumbers

Photo taken in our seed crop last summer.

A & C**Long, Slender, Dark Green**

This new cucumber is rapidly becoming very popular where a long dark green white spined kind is wanted.

The cucumbers are long, not too thick, smooth and dark green in color, making a very fancy pack. They are produced in great abundance on strong healthy vines.

We offer seed of our own growing of the true long strain. See prices below.

25 lbs. of any one variety will be supplied at 100 lb. rate.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.	100 lb.
A. & C. Superior Long White Spine. See above.....	\$.15	\$.40	\$1.40	\$13.50	\$125.00
CHICAGO PICKLING.....	.15	.30	1.00	9.00	80.00
Very prolific, and profitable for pickles. The young fruit is straight, blunt, medium deep green. Black Spine.					
CHINA. Finest Quality.....	.35	1.00	3.50
Grows 15 to 20 in. long and very slender. This is an excellent kind for roadside stands. Their length and smoothness give them the appearance of hothouse-grown cucs. For full description see our retail catalogue.					
DAVIS' PERFECT.....	.15	.40	1.10	10.00	90.00
Long straight fruit, tapering at both ends, very dark green.					
EARLY FORTUNE. Selected Stock.....	.15	.40	1.10	10.00	90.00
A very fine strain of White Spine, excellent for market and pickles. It is medium early and productive. The fruit is about 7 inches long, slightly tapering and of deep green color. It holds its color well when shipped. We have a very superior stock.					
EARLY WHITE SPINE. For Pickles.....	.15	.30	1.00	9.00	80.00
Early and very productive. Excellent for pickles and slicing.					
Green Prolific or Boston Pickling.....	.15	.30	1.00	9.00	80.00
Very prolific; short, bright green variety for pickles. B. S.					
HARRIS' DOUBLE YIELD PICKLE. See page 15.....	.15	.40	1.25	11.00	100.00

West India Gherkin.25	.70	2.20	20.00
WOODRUFF'S HYBRID. First Class Stock.15	.40	1.10	10.00	90.00
Grows 8 to 10 in. long and stays green a long time. We have a very fine strain.					

Harris' Double Yield—Enormous Yields of the Finest Pickles

Since we introduced this variety a number of years ago it has become increasingly popular among growers because of the enormous yield of fine straight pickles. The young cucumbers are produced in clusters of three or four like the fingers of your hand.

The cucumbers are very straight with blunt ends, medium deep green in color and of the very best shape for small pickles. This is also the earliest variety we know, enabling growers to plant late and still get a large yield of fine fruit. See prices on page 14.

"I planted $1\frac{1}{2}$ acres Harris' Double Yield last year and picked 500 bu. pickles. I think they are the best pickle grown." Joseph Martin, Masury, Ohio. Feb. 27, 1939.

Irondequoit Hothouse—Greenhouse Bred Strain

This is the famous variety which has been developed by the greenhouse growers around Rochester. The seed has been saved for us entirely from perfect fruit grown under glass by an expert cucumber grower in Irondequoit. It will produce remarkably fine uniform cucumbers. The fruit is long, slender, and deep green, nearly perfectly solid with very few seeds. The vines are vigorous and very prolific.

100 seeds 75c; 200 seeds \$1.75; 500 seeds \$3.25; 1000 seeds \$5.50.

Double Yield Pickles

WITLOOF CHICORY—French Endive

An ounce of seed will produce 3000 to 5000 roots.

WITLOOF CHICORY. Special Forcing Strain. An exceptionally fine strain, grown from especially selected fully developed forced heads. Will give a high percentage of perfect heads when forced. Oz. 30c; $\frac{1}{4}$ lb. 85c; lb. \$2.75.

Witloof Chicory. (For Greens) Good commercial strain. Oz. 15c; $\frac{1}{4}$ lb. 30c; lb. \$1.00.

COLLARDS

GEORGIA. Large cabbage-like leaves, which grow loosely on stems $2\frac{1}{2}$ -3 ft. tall. Does not form heads. May be sown in spring and transplanted like cabbage or drilled in June or July. Popular in the South for table use and stock feeding. Oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c; 10 lbs. \$6.50.

Feld Salat (Ger.) CORN SALAD or Fetticus Valeriannt (It.)

LARGE ROUND-LEAVED. Market Gardener's Dark Green Strain. The leaves are uniformly large, and dark green. Yields large crop. Oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25; 10 lbs. \$11.50.

Garten-Kresse (Ger.) CRESS Agretto (It.)

EXTRA FINE CURLED—Also called Pepper Grass. True. Oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c.

WATER CRESS. Improved Broad-leaved. This is a much better strain than the common Water Cress. Excellent also for forcing in greenhouses and frames. Oz. 45c; $\frac{1}{4}$ lb. \$1.25; lb. \$4.00.

Loewenzahn (Ger.) DANDELION Dente di leone (It.)

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lbs.
LARGE THICK LEAVED. Dark Green (Arlington Strain)	\$.50	\$1.35	\$4.50	\$40.00

This strain is the thick leaf, dark green variety. Strong upright growing plant, with good hearts.

ITALIAN DANDELION. Cichoria Catalogna30	.90	3.00	27.50
-------------------------------------------------	-----	-----	------	-------

Large dark green dandelion like leaves, which are cut several times during the season for "greens." Ours is the true Italian stock.

Dill (Ger.) DILL Aneth (It.)

LONG ISLAND MAMMOTH is much superior to the common dill, being larger and more productive. Oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 70c; 10 lbs. \$6.00; 100 lbs. \$55.00.

Common. A good commercial stock, but not equal to Long Island Mammoth. Oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 55c; 10 lbs. \$5.00; 100 lbs. \$45.00.

New Hampshire Hybrid

EGG PLANT

*Eier pflanze (Ger.)**Melanzani (It.)**An ounce of seed will produce about 2000 plants.*

New Hampshire Hybrid

Early and Prolific

Introduced last year this new variety has proved a real acquisition for growers who have difficulty in producing egg plant profitably in the North.

It is earlier than Black Beauty, grows fine dark colored fruit large enough for most markets and is remarkably prolific. On our farm it produced 8 to 10 good size fruits and several smaller ones on a single plant. Seed grown on our own farm and of high germination. See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.
BLACK BEAUTY. True Stock	\$.50	\$1.35	\$4.50
We can strongly recommend this stock as it is the finest strain of Black Beauty that we have ever seen. The plants are strong and sturdy, producing an abundance of uniformly large handsome dark purple fruit even here in the North.			
EARLY LONG PURPLE. Early and Prolific. Dark. True Stock45	1.20	4.00
Fruit 7 to 9 in. long, not over 2 to 3 in. through. Early and very prolific, deep purple.			
Extra Early Dwarf Purple or Black King45	1.20	4.00
Very early, dark and prolific, but not as large as above kinds.			
NEW HAMPSHIRE HYBRID. (New) See above $\frac{1}{4}$ oz. 25c.	.75	2.35	...

Fenchel (Ger.)

FENNEL

Finocchio (It.)

MAMMOTH (Improved Florence). Large Round Bulb. Best for Market. This exceptionally fine strain produces large, round bulbs. Oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.50.

Endivien (Ger.)

ENDIVE

*Endivia (It.)**An ounce of seed will sow about 100 feet of row; 2 to 2½ lbs. per acre.*

	Oz.	$\frac{1}{4}$ lb.	lb.
DEEP HEART FRINGED. (New)	\$.25	\$.70	\$2.25
An entirely new and distinct variety. Large and robust with broad fringed leaves and full heart. All growers of endive should try some. See also our retail catalogue.			
GREEN CURLED PANCALIER. Best for Late Market. Pink Ribbed15	.40	1.25
The leaves are not so finely cut as the Green Curled. Has fuller, heavier hearts. A favorite of market gardeners. This variety does best on rich soil.			
GREEN CURLED. Also called "Chicory." Green ribbed15	.40	1.25
Leaves finely cut and curled. Exceptionally uniform with a fine heavy heart.			
FLORIDA DEEP HEART15	.45	1.50
Broad leaves, dark green, slightly curled, produces large deep heads, which blanch well in the center. One of the best varieties, especially for late market.			
FULL HEART BATAVIAN (Escarolle). True Dark Green Strain15	.45	1.50
Our strain of this variety produces heads which are tightly packed with broad dark green leaves. Blanches well. A very superior strain.			

French Endive—Witloof Chicory

*See under Chicory on page 15.**Knoblauch (Ger.)*

GARLIC

Aglio (It.)

The bulbs should be separated into flakes or "cloves" and set out like onion sets. Bulbs for planting: Lb. 35c; Transportation paid. Not paid: 5 lbs. or more 25c per lb.

Blatterkohl (Ger.)

KALE

*Cavolo verdi (It.)**One pound of seed will sow about one acre of land.*

	$\frac{1}{4}$ lb.	lb.	10 lb.
DWARF CURLED or Blue Scotch	\$.25	\$.80	\$7.00
Very fine curled leaves, of dwarf habit and deep bluish green color.			
SIBERIAN. Also called "Sprouts"20	.60	5.50
Dwarf spreading, broad leaves curled only at the edges. Color blue gray. Very hardy.			

Kohlraben (Ger.)

KOHL RABI

*Cavolo rapa (It.)**An ounce of seed will sow about 200 ft. of row.*

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
EXTRA EARLY WHITE. (New)	\$.35	\$1.00	\$3.25	\$30.00
A very superior short top strain, maturing before Early White Vienna. A very uniform stock, best for outdoor and forcing. Similar to Prague Forcing, Triumph of Vienna, etc.				
Early White Vienna20	.55	1.75	16.50
Round white bulbs, early. Can be used 10 weeks after sowing.				

Lattich (Ger.)

LETTUCE

Lattuga (It.)

An ounce of seed will sow 250 ft. of row; about 2 lbs. per acre.

Imperial 44 — Surest Heading “Iceberg” Lettuce for the East

(See photo on Front Cover)

This new lettuce may entirely change the ideas of Eastern lettuce growers. It was outstanding in hundreds of trials in search for an iceberg lettuce to grow on muck. It is the only variety which does well on a wide range of soils both upland and muck, and will produce crops that can compete successfully with western grown Iceberg. Not only does it head better than any other strains but has shown marked resistance to tip burn. We have seen trial rows cut 100% good heads in July and commercial crops fully 90%.

The head is true Iceberg type, solid and of fine quality. Muck grown heads are usually a little larger than on upland. We urge you to give this lettuce a good tryout this year.

NOTE: Seed of true Imperial 44 is white. See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
BIG BOSTON. Special Strain.(100 lbs. \$90.00)	\$.15	\$.40	\$1.25	\$10.00
An exceptionally fine strain of this popular variety. The heads are solid and compact, and stand a long time. There is no better stock.				
Black Seeded Simpson.15	.40	1.25	10.00
An excellent loose headed variety.				
Chicken.10	.30	1.00	9.00
Immense leaves. Runs up rapidly. Use for green feed for chickens.				
COS or ROMAINE. Trianon Self-folding. The best variety.15	.45	1.50	14.00
Large long heads of fine quality and attractive appearance. Used for forcing under glass and outdoor culture. Always finds a ready sale.				
COSBERG. (New). Fine quality45	1.20	4.00
Cross between Cos and Iceberg types. See full description in Retail Catalogue.				
GRAND RAPIDS.15	.45	1.50	14.00
This strain is excellent for greenhouse growing and is used by the most critical greenhouse men. The leaves are light green, uniformly well curled.				
GRAND RAPIDS. U. S. No. 1.25	.70	2.20	20.00
This comparatively new strain of Grand Rapids has proved to be a very superior forcing and outdoor variety where a leaf or “curly” lettuce is desired. The plants are a little more robust than other strains and fill out more, very uniform for size and well curled. The color is light green.				
IMPERIAL 44. (New) See above30	.85	2.75	25.00
IMPERIAL 847. (New). Black Seed.30	.85	2.75	25.00
Outstanding for its ability to produce fine solid heads of “Iceberg” type. One of the few kinds which will succeed in both muck and upland and produce good heads in July as well as early spring and fall. Heads larger than Imperial 44 and a little later. Many growers have used this strain with marked success.				
May King. For Frame Forcing15	.40	1.25	11.50
A very early head lettuce for open ground or forcing.				
NEW YORK No. 1220	.60	1.85	17.50
This strain of Iceberg type is still preferred by some growers on upland.				
NEW YORK No. 515. Improved “Iceberg” Type25	.70	2.20	20.00
Earlier than New York No. 12 and preferred by most growers. Recommended for upland growing only. Heads are large and solid. This is the sure heading strain which has pleased our customers for a number of years.				
SALAMANDER. (Dreer’s All Heart or Black Seeded Tennis Ball) ..	.15	.40	1.25	11.50
Large heads, stands well in hot weather.				
WHITE BOSTON. Special Strain. See below... (100 lbs. \$125.00) ..	.20	.55	1.75	15.00

White Boston

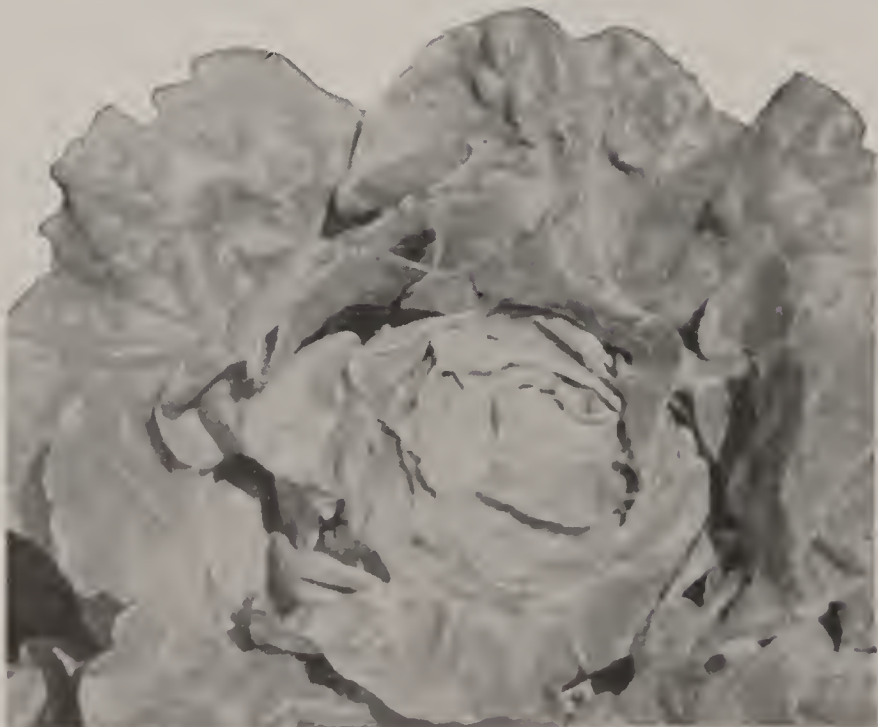

Special Strain

One important thing about the Harris’ Strain of White Boston is the uniform manner in which it heads, so that there is practically no waste in cutting a crop.

It has proved to be more resistant to tip burn than any variety we have ever seen.

You cannot get a better strain of White Boston Lettuce no matter what you pay for the seed. Our stock is fully equal to any strain obtainable. See prices above.

“My parents and myself have used your seeds since 1882 with success and satisfaction.” J. VanValkenburg, Watertown, N. Y. May 16, 1939.

White Boston—Special Strain

*Lauch (Ger.)***LEEK***Porro (It.)***ELEPHANT. Large thick stalks**

Oz.	¼ lb.	1 lb.
\$.25	\$.75	\$2.50

This new variety is a distinct improvement over the old kinds of leek. The stalks are large and very sturdy. The bottoms clear pearly white and smooth with the white part extending far up the stalk. *An ounce of seed will sow about 200 feet of row.*

*Melone (Ger.)***MUSKMELONS or Cantaloupes***Popone (It.)*

An ounce of seed will plant about 50 hills; 2½ to 3 lbs. per acre.

Market King Muskmelons

Harris' Muskmelon Seed

Growing seed of early highly productive and fine quality muskmelons for northern Market Gardeners has been one of our specialties for over twenty years. Our strains are now considered the standard of excellence and you can be sure that ours are the best muskmelons for the North.

**HOTENTS
for Melons**

These large strong field forcers are ideal for vine crops such as melons and cucumbers. Economical and practical. Used by successful growers everywhere. See Inside Back Cover.

Market King**A Fine Quality Melon for Market and Shipping**

These melons are remarkable for their uniform sweetness and high flavor. You can actually cut hundreds without finding a poor melon. Because of this fact many growers are changing to Market King each year.

We find this new variety an exceptionally good melon for shipping as well as for local markets where a medium size melon is wanted. It is very similar to a number of varieties, such as Pride of Wisconsin, Queen of Colorado, A & C and Jersey Gold.

The melons are medium size, grow very evenly, and are extremely heavily netted. The shape is well shown in the photograph above. The skin turns to a creamy yellow when ripe. The flesh is very thick with a small seed cavity, deep orange in color and of fine texture.

The vines are more healthy and vigorous than any kind we have seen, producing an enormous yield of fine fruit. This melon ripens normally a week later than Honey Rock and a few days later than Benders Surprise. See prices on next page.

"Your Market King is a wonder, shall plant 10 acres next season. No comparison with other melons.

P. N. Saltmarsh, New Boston, N. H., Oct. 14, 1939

Bender's Surprise**Harris' Specially Selected Northern Grown Strain**

This is without doubt the leading large melon for the East. These large, heavily netted melons have no equal for combined large size, attractive appearance, fine flavor and long keeping qualities.

We have bred and grown this stock for over twenty years here on our own farm always paying special attention to high quality, earliness and trueness of type. This careful selection has made ours the *one* outstanding stock of this variety.

Although this is *not* the true old Irondequoit, which has practically disappeared from trade, growers and consumers refer to this variety now when they say "Irondequoit" melons.

There is no use buying inferior seed when Harris' Northern Grown Strain can be purchased at the low price we charge. See prices on next page.

"Two years ago I purchased my truck garden seeds from you and had good results. Last year I was persuaded to buy from another house. Believe me I soon discovered that there was a great deal of difference in seeds and the place from which they come.

J. Gardinier Mills, Concord, N. H., March 1, 1939

MUSKMELONS continued on next page.

MUSKMELONS—Continued

Delicious—The Earliest Large Melon

This fine melon is becoming more and more popular for local sales and roadside stands. It is the earliest large melon of high quality grown, and we recommend it highly for roadside trade and local markets. It will not stand long distance shipping.

Our strain is noted for the large yield, vigor of vine, uniform size and type and remarkably sweet flavor. If you grow melons, plant some Delicious. See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
ARISTOCRAT. Superb Quality.....	\$.35	\$1.00	\$3.25	\$30.00
Large melons with very thick flesh of unexcelled quality. Does not keep well enough for general shipping, but at roadside stands with discriminating trade it will command highest prices because of the fine quality and appearance.				
BENDER'S SURPRISE. "Harris' Special Strain." See page 18...	.25	.75	2.50	22.50
DELICIOUS. The Earliest Large Melon. See above.....	.25	.75	2.50	22.50
Emerald Gem.....	.15	.35	1.10	10.00
Small, round, green, slightly netted, with yellow flesh of finest flavor; very early and prolific. A very uniform stock.				
Golden Champlain. Also called Lake Champlain.....	.20	.55	1.75	16.50
The earliest melon and valuable on that account. Melons are medium size.				
HALE'S BEST. For Distant Markets.....	.15	.35	1.10	10.00
The earliest and best of the Rocky Ford type for the East. Medium size, oval fruit. Very heavily netted. Flesh thick, deep orange and of finest quality. Ours is an excellent stock with fruit that is remarkably uniform in size, shape and quality.				
Hearts of Gold (Large strain).....	.15	.40	1.25	11.50
A fine melon for shipping, medium in size, round and well netted. Flesh thick, orange yellow, of uniformly excellent flavor. We have a fine stock of the large strain of this well known variety.				
HONEY ROCK or SUGAR ROCK.....	.15	.40	1.35	12.50
We have a fine stock of this popular melon which is largely grown in many sections because of its attractive appearance, fine flavor and ability to stand handling. The melons are nearly round, about 5" in diameter.				
MARKET KING. New. See preceding page.....	.25	.75	2.50	22.50

Wasser-Melone (Ger.) WATERMELONS Cocomero d'acqua (It.)

An ounce of seed will plant about 25 hills; 2 to 3 pounds to the acre.

The varieties we have listed here are all suitable for growing in the North, as they are early kinds and in our climate under usual conditions will produce ripe fruit before frost from seed sown in the open ground. See our general catalogue for full descriptions.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
HUNGARIAN HONEY. The Sweetest Watermelon.....	\$.12	\$.30	\$1.00	\$9.00

WONDER MELON.....	.12	.30	1.00	9.00
The largest and best of the oblong varieties for growing in the North. They are early, dark green with bright red flesh of fine quality. Will produce large crops even where the seasons are short.				
GREEN CITRON or Colorado Preserving.....	.10	.25	.75	7.00
Not a true watermelon, outer flesh is used in preserving. Very prolific. Green seeded.				

Champignonbrut (Ger.) MUSHROOM SPAWN Fungo pratajola (It.)

Full directions for growing are sent with each order of spawn.

Finest pure culture spawn, absolutely fresh, Mushrooms can be raised in cellars or under greenhouse benches where the temperature can be kept between 50 and 60 degrees.

Ours is pure culture spawn grown by one of the largest mushroom producers.

BOTTLE SPAWN. (White). Grown in bottles under sterile conditions after which the bottle is removed and the spawn packed in a carton. One carton will spawn 40 sq. ft. of bed. Price: Single Carton \$1.25; 3 cartons \$3.00. Prepaid. Not prepaid: 10 or more cartons at 80c per carton. Weight per carton about 1 lb. Write for prices on larger quantities.

MUSTARD

An ounce of seed will sow about 300 feet of row.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
FORDHOOK FANCY. (Long Standing).....	\$.10	\$.25	\$.65	\$6.00
Leaves are slightly smaller and more finely cut and curled than the Southern Curled. A very pure stock.				
LONG STANDING. (Southern Curled).....	.10	.25	.65	6.00
Will stand without bolting to seed for a long time. During the hottest part of the summer this variety has stood for three weeks after it was large enough to cut, without going to seed. The leaves are a medium dark green with beautiful finely curled edges.				

*Ocher (Ger.)***OKRA or GUMBO***Ocra (It.)*

PERKINS' LONG-POD. Standard Market Variety. Large green pods. Ours is a true uniform stock. *An ounce of seed will sow about 50 feet of row. Oz. 10c; 1/4 lb. 20c; lb. 60c.*

*Zweibel (Ger.)***ONIONS***Cipolle (It.)*

*An ounce of seed will sow 125 feet of row.
It requires 5 to 6 lbs. of seed per acre.*

Ed. Winsinger (right) and L. H. Chapell of Elba, N. Y.
in their crop of Early Yellow Globe Onions.
Grown from Harris Seed.

Early Yellow Globe

The Best Early Yellow Onion

Earliness, enormous crops, fine appearance and unusually good handling and keeping qualities are the attributes of this onion which make it the leading variety both for upland and muck.

The onions mature at least two weeks before Yellow Globe Danvers, are nearly globe shaped, deep yellow in color and with a good skin.

We are pleased to offer the same true stock of Early Yellow Globe which has produced such fine crops for our customers during the past six years. See prices on next page.

Riverside Sweet Spanish

This fine onion can be grown almost anywhere in the East and is becoming more popular each year. It is an excellent variety both for upland and muck. The onions are large and handsome often weighing a pound or more and are fine keepers.

They require a little more time than the early varieties but are vigorous, hardy growers, withstanding adverse growing conditions better than any other kinds we know. See prices on next page. See also plants on next page.

"The onions (plants) came and they were the best we have had yet. Even better than two years ago, and I am sending in another order. Your seed is the best we have ever had."
Elmer Davis, Marathon, N. Y. May 8, 1939.

Brigham
Yellow Globe

*Noted as a long
keeper.*

Brigham Yellow Globe

*Also called "Michigan Onion" and
"Michigan Strain"*

This remarkable onion together with Early Yellow Globe has virtually superseded all other kinds in the East and Middle West for growing on muck and is also a very popular upland variety.

It is outstanding because of the large yields obtained, the fine rich golden color together with a heavy thick skin which makes it the best variety for storage.

The seed we offer is of the **true Brigham Strain**, deep globe in shape and even more uniform for type and size than it was when first introduced. See prices on next page.

GERMINATION TESTS

Every package of Harris' Seeds is marked with the germination test. We will be glad to tell any onion grower how our seed of any variety germinates in our tests before he buys the seed.

Harris Onion Sets

We supply clean, firm, uniform and true to name onion sets. These are the best onion sets that can be obtained. See prices and varieties under ONION SETS on next page.

ONIONS—Continued

	$\frac{1}{4}$ lb.	1b.	10 lb.	100 lb.

SOUTHPORT WHITE GLOBE. (The Finest White)..... The largest and finest white onion. A very profitable variety for experienced growers as it always commands the highest prices.	.65	2.25	21.00	200.00
Southport Yellow Globe Has been superseded by Brigham Yellow Globe. (See above and on page 20.)
WHITE BUNCH. (White Lisbon)..... Popular in many markets. Forms mild sweet "green" onions early and flat medium size bulbs when mature.	.60	2.00	19.00	185.00
WHITE PORTUGAL or SILVER SKIN. Standard for Bunching.. Flat, white onions of mild flavor and early. Excellent for pickling and early green onions.	.60	1.80	17.00	160.00
YELLOW GLOBE DANVERS Our stock of this popular variety will produce onions of uniform globe shape with deep color and tight skin.	.60	1.70	16.00	150.00

ONION SETS

One peck of sets will plant 600 to 700 feet of row. Use 12 to 20 bu. per acre.

NOTE. At prices here quoted purchaser pays transportation on onion sets.

EBENEZER or "JAPANESE." The Best Yellow Sets. True Stock. 8 lbs. (Pk.) \$1.00; 32 lbs. (Bu.) \$3.00; 5 bu. or more at \$2.85 per bu.

SILVERSKIN (White). Best for bunching. 8 lbs. (Pk.) \$1.20; 32 lbs. (Bu.) \$3.50; 5 bu. or more at \$3.35 per bu. Write for prices on larger lots.

Riverside Sweet Spanish
Onion Plants

These plants which are grown in Texas have proved excellent for raising both early green onions and dry bulbs for late summer sale. More gardeners find it profitable each year to grow onions from our plants and our sales of onion plants in the past few years have steadily increased from a few thousand to nearly two millions.

Our experience has shown that Riverside Sweet Spanish is the most satisfactory kind to grow, *so we do not offer any other kind.* When set in the spring will produce large firm onions of the finest type in 8 to 10 weeks.

Price: 10 bunches (about 1000 plants) \$1.50; Full crate (about 6000 plants) \$6.00. Purchaser pays transportation. Weight per 1000, 6 lbs. Write for prices on larger lots.

The above plants are tied in bunches of about 100 plants; 60 bunches (about 6000) make a full crate.

NOTE. Onion plants can be supplied between April 15 and May 15th only. These plants can be ordered at any time for shipment between the above dates. Please state on the order when you want the plants sent.

A Single Bunch of Riverside Sweet Spanish Onion Plants
(about 100 plants).

PEANUTS

Plain—Uncurled leaves, used for flavoring10	.25	.80	7.50

*Erbesn (Ger.)***PEAS***Piselli (It.)**One pound of peas will plant 100 ft. of row. Two to five bushels per acre.*

*At the prices here quoted peas cannot be sent prepaid. Purchaser pays transportation on peas except as follows: If your order for vegetable seeds including peas amounts to \$20.00 or more we will prepay the freight charges.

The varieties we offer here are carefully selected as the best market garden kinds. Our seed is grown from the purest stocks, carefully cured, hand picked and of high germination. We will not handle any other kind of seed.

World's Record**Earliest Large Podded Wrinkled Peas**

This is the earliest wrinkled pea with large pods. It is ready only a few days after Mammoth Podded Extra Early and is much superior in quality. The pods are pointed 3 to 3½ in. long, medium dark green, containing large peas of the finest flavor.

The vines are about 2½ ft. high, sturdy and bear large crops. We offer an exceptionally fine early stock of this popular variety which we recommend highly. See prices on next page.

Laxton's Progress**Large Podded—Medium Early**

The stock we offer of this excellent variety is very superior, producing uniformly heavy yields of large handsome pods.

The vines grow 15 to 18 in. high and are covered with an abundance of large deep green pods 4 to 4½ in. in length. The peas ripen so uniformly that ordinarily two pickings will clean up the crop.

The big handsome well filled pods find a ready sale making this variety one of the best kinds to follow the extra early sorts. See prices on next page.

Midseason Giant

Also called—Giant Stride, Asgrow 40, Number 10, Wyoming Wonder, etc.

This variety comes on between the early sorts and the late varieties and has shown a remarkable ability to stand up and bear well in *hot dry weather*. The pods are large (4½ to 5 in. long) dark green and pointed. The yield is large, the pods being borne in great numbers on strong vigorous vines about 24 in. high. This is a high quality wrinkled variety and should not be sown until the weather is settled. See prices on next page.

Rogers Gilbo Peas

Rogers Gilbo—New Large Podded Main Crop Peas

This fine new variety has become one of the most popular sorts of the Midseason Giant group, and resembles that variety very closely. Compared to Midseason Giant, Gilbo has the same sturdy vine and large yield of big pods, but is a few days earlier in season. Also Gilbo is more hardy so that the seed can be sown earlier than Midseason Giant. This is a real advantage.

The pods are very attractive, $4\frac{1}{2}$ to 5 in. long, dark green and pointed and filled with large peas of superior quality. We recommend this new variety highly. See prices below.

PEAS—Early Varieties

25 lbs. or more of one variety will be supplied
at the 100 lb. rate.

	NOT PREPAID* (see page 22)

Telephone. ($4\frac{1}{2}$ ft. to 6 ft.)25	1.45	2.55	7.85	14.00
Our seed is of a superior strain, having large very deep green pods.					

Pastinake (Ger.)

PARSNIPS

Pastinaba (It.)

An oz. will sow 150 ft. of row. $2\frac{1}{2}$ to 3 lbs. per acre.

Harris' Model The Whitest Parsnips

Our customers find this to be the best variety that they can grow.

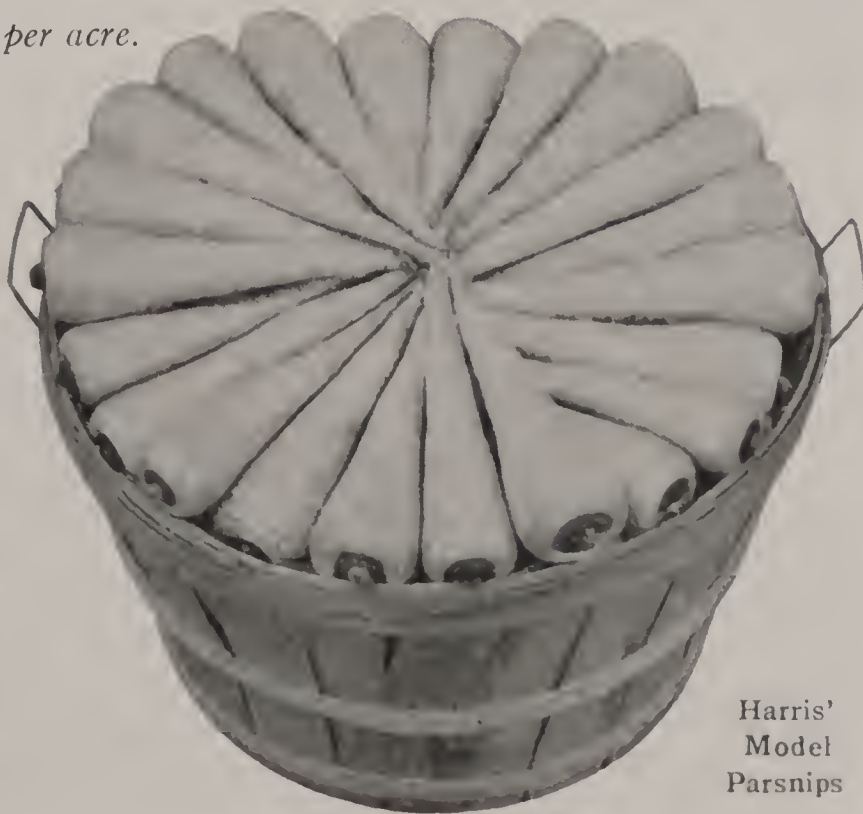

These parsnips are snow white and smooth with a minimum of side roots or prongs. They are hollow crown and of good length, but not too long. Their smoothness is quite remarkable, giving the roots a very attractive appearance so that they usually sell for top prices.

Our seed is grown from carefully selected transplanted roots.

Oz. 15c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.20; 10 lbs. \$11.00; 100 lbs. \$100.00.

Long Hollow Crown. Better than most stocks. Long smooth roots, not as uniform or white as Model.

Oz. 10c; $\frac{1}{4}$ lb. 25c; 1 lb. 75c; 10 lbs. \$7.00; 100 lbs. \$65.00.

Model
Parsnips

*Pfeffer (Ger.)***PEPPERS***Peperoni (It.)**An ounce of seed will produce about 1000 plants.***Harris' Northern Grown Pepper Seed**

If you want to grow peppers for profit use Harris' Northern Grown Pepper Seed. We have specialized for over twenty years in growing peppers on our farm. Years ago we found out that the varieties which are usually grown in the long seasons and warmer climates farther south did not ripen enough fruit to make peppers a profitable crop in the north. So we developed a number of

early, heavy bearing varieties, which are suited to our conditions and will produce an abundance of ripe fruit where seasons are short.

These varieties are marked "Seed of our own growing" in the descriptions below.

Harris Wonder Peppers
*Grown by Vernon A. Doty and his son (above)
of West Springfield, Mass.*

Harris' Wonder A Truly Great Pepper

This pepper combines the smooth blocky thick fleshed type of California Wonder with earliness and high yield and gives you not only large crops of green peppers but an abundance of ripe fruit before frost.

The peppers are large, chunky and beautiful dark green turning to rich red when ripe. They are very thick meated and the quality is excellent. A level bushel weighs over 30 lbs.

Those who have grown this variety since we introduced it in 1937 have been most enthusiastic in its praise. Grow some this year, we know you will like it. *Seed of our own growing.*

See prices on next page.

Harris' Earliest—The Earliest Sweet Pepper

Introduced in 1918 and still going strong!

Harris' Earliest is an invaluable variety for the extreme northern parts of the country where other peppers will not ripen. We grow and check in our trials practically every new pepper which is brought out and we have not seen one which is earlier. It is the result of over twenty years of growing here in the North and constant improvement for size, earliness and yield. The plants are not large but are literally covered with medium size, attractive bright red fruit. If you want very early fruit or have trouble getting peppers ripe, we recommend that you plant some of the Harris' Earliest. *Seed of our own growing.* See prices on next page.

Harris' Improved SQUASH Pepper—Very Early and Heavy Yielder

This pepper replaces the old type known as Squash, Cheese, Sunnybrook, etc.

It is so early and prolific that it produces three times as many peppers as any other "Squash or Cheese" pepper which we have seen. This early character and high yield make it a profitable kind to grow even here in the north. The fruit is the true "Squash" shape, with very thick flesh which is mild and sweet. *Seed of our own growing.* See prices on next page.

NOTE—In many growing sections these peppers are known as "Pimientos" and are used for canning.

Harris' Early Giant—The Earliest Large Pepper

Harris' Early Giant which we introduced a number of years ago is recognized as the standard large early variety and gardeners in the North find it a very profitable crop to grow.

It will produce an abundance of large peppers often 4½ in. long and 4 in. across, and is only a week later than Harris' Earliest, the earliest pepper grown. To be sure of the true stock, get your Harris' Early Giant from us. *Seed of our own growing.* See prices on next page.

"I have used your garden seed for several years and I don't believe they can be beat for the earliness and general quality of the vegetables produced from them. The plants grown are so true to type and uniform in size and color, etc.

It is hard to single out any single vegetable over the others for excellence, but your Harris' Wonder pepper is certainly rightly named. The peppers I grew from your plants of that variety last year were the best I ever had—large, thick and handsome, practically every fruit the same size."

Fred L. Armstrong, Dalton, Mass, Feb. 21, 1939.

PEPPERS—Continued

Harris' King of the North

Extremely Large, Early and Prolific

Since we introduced this variety in 1934 it has earned a reputation of producing greater yields of large peppers here in the North than any variety grown.

The plants are medium size, branching and literally covered with the immense fruit. The size and shape of the peppers is well shown in the photograph to the right.

The flesh is firm, mild and sweet. If you have not done so we urge you to try these peppers this year. *Seed of our own growing.* See prices below.

"We live in a zone that has frost often into early June and wish to state that your Northern Grown seed of peppers have never failed."

I grew your King of the North, some as large as 7 in. long and 4 in. wide — as fleshy as your Improved Squash and equal to heavy Pimientos. They can't be improved on."

F. W. L. Schneider, Tyrone, Penn. March 6, 1939.

HARRIS' PEPPER PLANTS

We specialize in growing fine strong well hardened true to name pepper plants. See page 35 for varieties and prices.

Harris' King of the North Peppers.
Noted for heavy yield and large size.

Hot Portugal—Large

If you want lots of large, long *hot* peppers, grow this kind. The fruit is long, pointed and quite smooth for a pepper of this type. They normally average six inches or over in length and are borne profusely on the sturdy plant. This pepper is bright red when ripe and in addition to its large size, is just as hot as the old Giant Cayenne. *Seed of our own growing.* See prices below.

NOTE: 1/2 ounce of pepper seed supplied at 1/2 the ounce price.

	Oz.	1/4 lb.	lb.
CALIFORNIA WONDER. Large, thick flesh.	\$.50	\$1.50	\$5.00

SMALL SUGAR or Pie Pumpkin.....	.10	.25	.75	7.00
The most popular variety for market. Small round, deep orange and of excellent quality. Early and prolific.				

*Radies (Ger.)***RADISH***Ravanelli (It.)* $\frac{1}{4}$ lb. of seed will sow about 300 ft. of row.

NOTE. Every package of Harris Seeds is marked with the germination test. To growers who are interested we will be glad to furnish germination figures of our radish seed before they buy their seed.

Cavalier**NEW Short Top Scarlet Globe**

Seldom has a new variety met with such instant and general approval as this new radish. Growers everywhere are most enthusiastic over it.

The short tops, brilliant deep scarlet color, beautiful shape and extreme uniformity, and ability to stand a long time make it the best forcing type we have ever seen. It is often possible to pull practically 100% number one radishes. It is also especially good on muck soils.

Leading growers tell us that these radishes sell for the best prices even when the market is slow.

The seed we offer is all grown from carefully selected transplanted roots. See prices below.

Early Scarlet Globe Radish
Special Strain

This is the finest regular Early Scarlet Globe both for outdoor and greenhouse growing.

The radishes are the true olive shape, and of an attractive bright red color. They are early and very uniform in maturity and have tops which, while a little taller than Cavalier, do not grow too large. The seed is vigorous and of high vitality which is of utmost importance to the greenhouse grower. See prices below.

Comet (NEW)**Round, Bright Scarlet—Long Standing**

In our trials during the past few years this variety stood longer than any other kind, even attaining a growth of 2" in diameter without becoming soft. It is a very attractive radish, nearly all round, with fine tap roots, brilliant scarlet in color and with medium tops. Growers who desire a round radish both for outdoors and forcing should try this new kind. See prices below.

25 lbs. or more of any one variety will be supplied at the 100 lb. rate.

	$\frac{1}{4}$ lb.	lb.	10 lb.	100 lb.

COMET. Long Standing. (NEW). See above.....	.30	1.00	9.00	85.00
Crimson Giant Globe.....	.25	.70	6.50	60.00
Good commercial stock. Scarlet Champion (described on page 27) is a much better radish of this type.				
Delicacy. (White Globe).....	.25	.80	7.50
A very fine white radish for summer or late fall use. Of globe shape, pure white and of fine quality. One of the best white summer varieties.				
EARLY SCARLET GLOBE. Special Strain. See above.....	.25	.70	6.50	60.00
Early Scarlet Globe.....	.20	.55	5.00	45.00
An excellent stock but not quite as fine as our special strain.				

RADISHES continued on next page.

Cavalier Radish
Noted for its small top and uniform fine type.

RADISHES—Continued

	$\frac{1}{4}$ lb.	1 lb.	10 lb.	100 lb.
EARLIEST SCARLET WHITE-TIPPED. Forcing Strain	\$.25	\$.70	\$6.50	\$60.00
The radishes are round, brilliant scarlet with white bottoms. This is the finest strain of white-tipped radish, having small tops and is superior both for forcing and outdoor growing.				
FIRECRACKER. (New) Half Long Scarlet30	.85	8.00	75.00
Bright scarlet, 2½ to 3" long, solid and crisp. Short top. Does equally well in greenhouse or open ground. Has replaced Long Scarlet Short Top.				
Giant White Stuttgart25	.80	7.50
HARRIS' SPECIAL SCARLET FORCING. (Glowing Ball)25	.70	6.50	60.00
This is the best short top round forcing radish we know. Very early, perfectly round, short top and a brilliant scarlet color.				
ICICLE or Pearl Forcing. Short-topped Strain. See below25	.65	6.00	55.00
SCARLET CHAMPION. (New) Large Globe30	1.00	9.00
This is the leading large globe radish for outdoor sowing. The bulbs attain a large size and are firm and mild. The color is a fine deep scarlet.				
WHITE STRASBURG25	.80	7.50

Icicle Radish (White)

Short-Topped Strain—Also Called Pearl Forcing

This is an ideal stock of Icicle Radish, both for forcing and outdoors and it can also be grown successfully on muck. We have never seen a better stock. The radishes are uniformly smooth and clear white. The tops do not grow too long in the greenhouses or frames, but are long enough for bunching when grown outdoors. See prices above.

Winter Radishes

Sow in August and store in moist sand for winter.

	$\frac{1}{4}$ lb.	1 lb.	10 lb.
BLACK SPANISH TURNIP	\$.25	\$.80	\$7.50
Roots are round or turnip shaped and grow very uniform in shape and size. Clear white flesh, skin deep black without white streaks.			
Long Black Spanish25	.80	7.50
Similar to above but with long oval roots, often 8 to 9 in. long by 1½ in. in diameter. A very even stock.			

Rhabarber (Ger.)

RHUBARB or PIE PLANT

Rabarbaro (It.)

One ounce of seed will sow about 100 feet of row.

	$\frac{1}{4}$ lb.	1 lb.	10 lb.
Myatt's Linnaeus. Early large stalks	\$.45	\$1.50	\$14.00

MacDonald Rhubarb Roots

We have an exceptionally fine lot of roots of the famous MacDonald Rhubarb. This rhubarb is the most distinct improvement made in rhubarb in many years and is conceded to be the best rhubarb ever produced.

The plant is vigorous and strong, producing large tender stalks which are deep crimson in color. They make a very attractive bunch and when cooked the sauce is a beautiful deep pink color and of excellent flavor. Market growers who have been fortunate enough to get these roots in the past find this rhubarb sells readily at the highest prices.

We have not succeeded in producing this variety from seed.

Roots only—Strong divisions. Not prepaid: 10 for \$1.65; 100, \$10.00; 1000, \$85.00.

See page 35 for other Rhubarb Roots.

Sauerampfer (Ger.)

SORREL

Acetosa (It.)

One ounce of seed will sow about 250 feet of row.

	$\frac{1}{4}$ lb.	1 lb.	10 lb.
Improved Broad-Leaved	\$.45	\$1.50	\$14.00
NARROW LEAVED. Special Strain70	2.25	20.00

This is the variety preferred by most growers.

SALSIFY or Vegetable Oyster

Haferwurz (Ger.)

Sassefrica (It.)

MAMMOTH SANDWICH ISLAND. This is the largest and best variety, producing straight roots with but few side shoots.

One ounce of seed will sow about 100 feet of row.

$\frac{1}{4}$ lb. 50c; 1 lb. \$1.70; 10 lbs. \$16.00.

SWISS CHARD or Spinach Beet

Beisskohl (Ger.)

Bieta (It.)

	$\frac{1}{4}$ lb.	1 lb.	10 lb.
FORDHOOK GIANT. Best for Market	\$.30	\$.85	\$8.00
Large dark green well blistered leaves with broad white stem and rib.			
Lucullus. Large curly leaves30	.85	8.00
Silver Leaf. Smooth dark green leaf, white rib25	.75	7.00

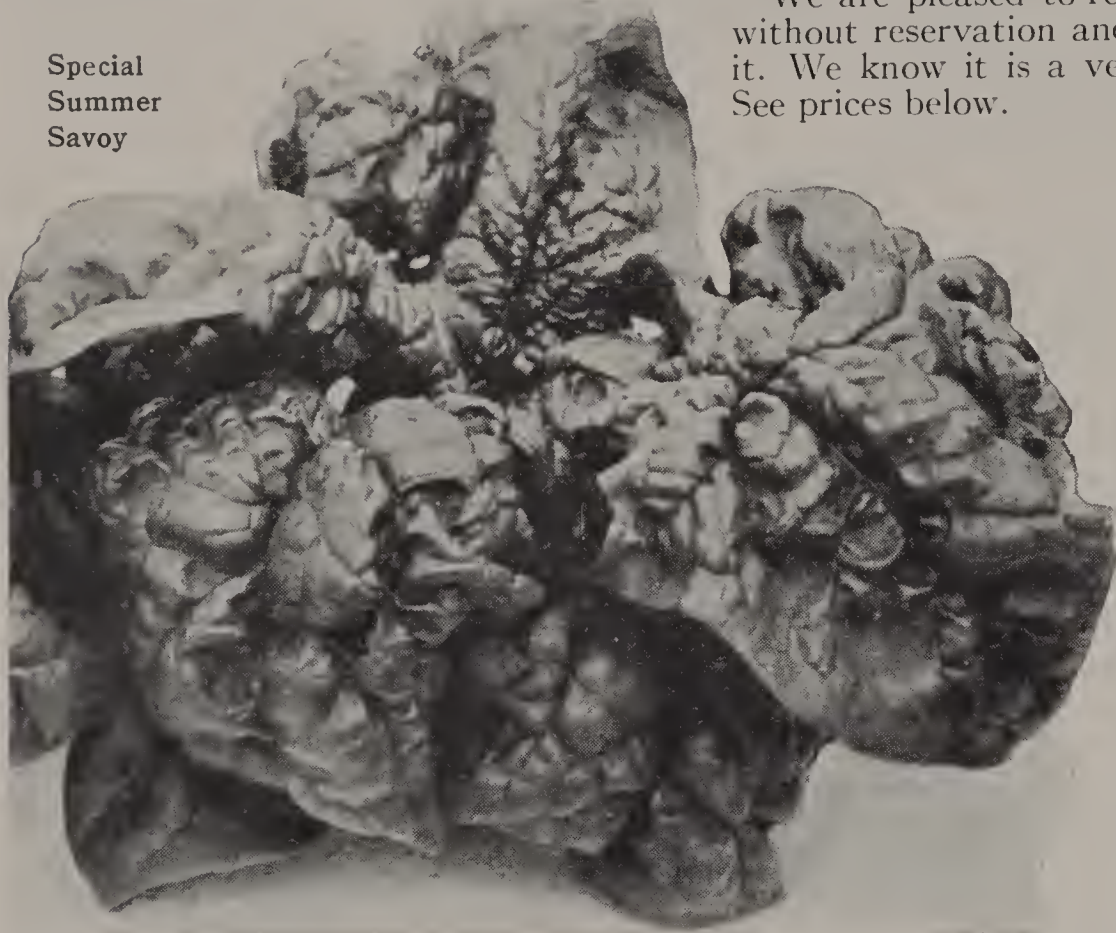

Fordhook Giant Swiss Chard
The best kind for market.

*Spinat (Ger.)***SPINACH***Spinace (It.)**Sow about 12 to 20 lbs. of seed per acre in rows.***Special Summer Savoy—Extra Selected—Long Standing**

This is the most uniform stock of Long Standing Savoy Spinach sold. The leaves are extremely crumpled or "Savoyed," every plant is just alike and has a very attractive dark green color. Growers find the yield per acre to be consistently very heavy.

We are pleased to recommend this extra fine stock without reservation and urge our customers to plant it. We know it is a very profitable variety to grow. See prices below.

Special
Summer
Savoy

**Viking (NEW)****Early — Large Leaved Long Standing**

This new spinach has proved to be a most excellent kind for spring sowing as it grows very rapidly and thus gets to cutting size early. It will continue to grow for a long time and produce immense plants without going to seed.

The large leaves resemble Nobel Giant Leaved in habit of growth but are somewhat darker in color and more crumpled. Viking will produce extraordinary large crops of fine looking spinach that sells well in market. See prices below.

Blight Resistant Savoy—For Fall Sowing

We have an exceptionally fine stock of this variety. It is the *true Virginia strain* which is practically 100% resistant to blight and can be depended on to produce large crops of fine dark well crumpled spinach in the fall where other varieties blight and fail entirely.

Blight Resistant Savoy does not stand as well as most other kinds in the spring, although our strain will stand three to four days longer than most strains of this variety which are now sold. See prices below.

*NOTE. At the prices here quoted spinach seed cannot be sent prepaid. Purchaser pays transportation on spinach seed except as follows: If your order for vegetable seeds including spinach amounts to \$20.00 or more we will prepay the freight charges.

We shall be glad to quote special prices to growers who use larger amounts of spinach. Please write.

25 lbs. of any one variety will be furnished at the 100 lb. rate.

	NOT PREPAID* (See above)			
	1 lb.	10 lb.	100 lb.	500 lb.
BLIGHT RESISTANT SAVOY-LEAF. For Fall Crop. See above..	\$.25	\$2.10	\$19.00	\$90.00
KING OF DENMARK. Longest Standing25	2.20	20.00	95.00
This spinach will stand longer than any other kind. The leaves are very dark green, quite thick and have small stems. On this account and because of the heavy yield this is one of the best varieties for canning. True stock.				
LONGSTANDING BLOOMSDALE. (Savoy). For Spring Sowing .	.25	2.00	18.00	85.00
We have an exceptionally well bred strain. Large deep green, well crumpled leaves which produce enormous crops and stand a long time without bolting to seed. We recommend this stock.				
OLD DOMINION. For Fall Crop25	2.10	19.00	90.00
This spinach is becoming very popular for spring sowing in places where blight affects spinach and also for early fall sowing as it is <i>blight resistant</i> and will stand longer without going to seed than Blight Resistant Savoy. The leaves are large, dark green, well blistered or "Savoyed" producing large crops which stand up well when shipped.				
NEW ZEALAND. Not a true spinach. Valuable for summer45	4.25	40.00
NOBEL GIANT-LEAVED25	1.90	17.00	80.00
Large, early, medium dark nearly smooth leaves. Grows rapidly and is ready to cut early. Remarkably long standing. An excellent and profitable kind for spring sowing where large volume is wanted.				
Norfolk Savoy (Reselected Bloomsdale)25	1.90	17.00	80.00
An extra fine reselected stock of this old favorite.				
SPECIAL SUMMER SAVOY. Best Longstanding Bloomsdale.	.25	2.00	18.00	85.00
VIKING. (New) Large Leaved—Long Standing. See above25	1.90	17.00	80.00

Kuerbiss (Ger.)

WINTER SQUASH

Zucca (It.)

$\frac{1}{4}$ lb. of seed will plant 50 hills;
3 to 4 lbs. of seed per acre.

Blue Hubbard Harris' Selected Strain

This stock is the result of years of close breeding and is considered the finest, purest stock grown. It can be relied on to produce immense yields of large true type squash. The seed we sell is all of our own growing.

Although this was originally strictly a New England variety, the fine quality, enormous yields and excellent keeping quality have made this a most popular kind throughout the East.

Ours is the large, rugged strain that produces big yields that bring top prices.

See prices below.

Harris Blue Hubbard Squash
Selected from the seed crop on our North Farm

Warren Squash—Improved Essex Hybrid (New England Strain)

This fine old New England squash has become popular in many sections which formerly would not use "orange or red" squash. Our stock of this type has proved more than satisfactory.

The squash are early, medium size, very uniform in shape and heavily warted. We have bred this strain with a well formed but not too prominent "button." The flesh is fine grained, extra thick and the color a beautiful deep orange red. Seed of our own growing. See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
BLUE HUBBARD. Selected Strain. See above.....	\$.20	\$.60	\$2.00	\$17.50
Boston Marrow10	.25	.80	7.50
Popular fall squash, deep orange color. Used principally for canning and pies.				
BUTTERCUP. (New).....	.25	.70	2.25	20.00
This new small squash has exceptionally thick flesh and fine quality and is becoming very popular for roadside stands and local markets. See full description in our Retail Catalogue.				
DELICIOUS.....	.15	.40	1.35	12.50
Smaller than Hubbard, but of finer quality, deeper green shell with orange flesh. Dry and sweet.				
GOLDEN DELICIOUS.....	.15	.40	1.25	11.50
An excellent small yellow squash for roadside and market. Superb quality.				
Golden Hubbard.....	.15	.35	1.10	10.00
The same shape as Hubbard but with deep orange yellow skin.				
HUBBARD—True.....	.15	.35	1.10	10.00
Dark green smooth skin, fruit of high quality. We have a fine true strain.				
IMPROVED WARTED HUBBARD. (Dark Green).....	.15	.40	1.25	11.50
Larger, more warted and darker green than the true Hubbard squash. A true stock that will produce large crops.				
QUALITY. The richest small squash.....	.15	.40	1.25	11.50
An unexcelled small squash for roadside and market. Dark green, 7 to 9 in. heart shape. Flesh exceptionally dry and sweet. Seed of our own growing.				
TABLE QUEEN (The Individual Squash). Also called Des Moines, Acorn and Queen Ann.....	.15	.40	1.25	11.50
Small dark green fruit 5 to 6 in. long. $4\frac{1}{2}$ in. in diameter, deeply ribbed and very hard. We have a fine true stock of this popular variety.				
WARREN. Improved Essex Hybrid. See above.....	.20	.60	2.00	17.50

Seed Field of Straightneck Squash on our farm

SUMMER SQUASH

$\frac{1}{4}$ lb. of seed will plant about 100 hills;
5 to 6 lbs. of seed per acre.

Giant Summer Straightneck Butter Yellow

Market gardeners whose demand is for summer squash of butter yellow color will find this new strain ideally suited to their needs. It is early and very prolific. The fruits are smooth and entirely yellow even when young.

This type of Straightneck has been popular with many New England market gardeners. The seed we offer was grown on our own farm and we can highly recommend it.

SUMMER SQUASH continued on next page.

SUMMER SQUASH—*Continued*

Early Yellow Prolific

A New Summer Squash of Great Merit

These are straightneck squash, not as large as the Giant varieties, but they are borne in great profusion on the dwarf vines. These squash are very uniform for shape and size and are remarkable for their smooth skin and clear bright yellow color, having no trace of green even when very young.

Growers who have grown this squash were greatly pleased with their crops. If you have not grown it be sure to do so. See price below.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
Early Giant Crookneck.	\$.15	\$.35	\$1.10	\$10.00
Larger than the old Bush Crookneck and equally early. True strain.				
Early Yellow Bush Scallop.15	.35	1.10	10.00
Similar to the white, except in color. See below.				
GIANT SUMMER STRAIGHTNECK. Bright Yellow.15	.40	1.25	11.50
This is our original strain of <i>light yellow</i> Straightneck which has been so popular among gardeners because of the very large per cent of straight fruit, with thick meaty necks of the desired type. Some of the young fruits show a pale green color which gives them an attractive tender appearance. Growers find that this is the most uniform strain they can buy.				
GIANT SUMMER STRAIGHTNECK. Butter Yellow. See page 29.	.15	.40	1.25	11.50
EARLY YELLOW PROLIFIC. (New) See above20	.55	1.75	15.00
ITALIAN VEGETABLE MARROW (Cocozelle)15	.40	1.25	11.50
Long mottled green fruit of high quality. We have a fine stock which will produce dark green squash of uniformly good length. Bush vines.				
MAMMOTH WHITE BUSH SCALLOP. Also called "Cymling" . .	.15	.35	1.10	10.00
The popular type, producing large yields of thick creamy white, well scalloped fruit. Bush vines.				
Vegetable Marrow (English) White.15	.40	1.25	11.50
The fruit is about a foot long, 4 to 5 in. in diameter and creamy white. Running vines.				
DARK GREEN ZUCCHINI. Special Long Strain20	.60	2.00	17.50
This is a very superior strain with uniformly long dark green fruit, entirely without light grey fruit or light stripes. The young fruits are long and dark green. Exactly what is wanted.				

"Have used your Blue Hubbard Squash seed for the last three years and find they are tops for color, size, shape and productiveness." Fred G. Burckhart, Cape Elizabeth, Me. January 9, 1939.

Tomate (Ger.)

TOMATOES

Pomo d'oro (It.)

An ounce of seed will produce about 2000 plants.

Harris' New York State Certified Tomato Seed

This is the fifth successive year we have offered New York State Certified Tomato seed of our own growing. This seed must meet the *highest* standard of purity and freedom from disease.

Most of the tomato seed sold today is a by-product from fruit which has been processed in canning factories for the juice. Our Certified Tomato Seed is all grown on our own farms *for seed only*, and in comparatively small fields which have our careful individual attention.

Pritchard's Scarlet Topper

Also Called "Pritchard"

Because of its fine quality and beautiful appearance, this tomato has become a very popular market variety. Starting with stock seed sent us by the United States Department of Agriculture, we have been growing and selecting the seed here in the North in order to maintain the size, vigor and earliness of this variety.

This is a very heavy bearer. The fruit is medium early, ripening right after Bonny Best. The flesh is very solid with few seed cavities and a fine red color all through. It is quite free from cracking. The quality is extra fine being mild and without acidity.

The plants are robust but not of rank growth. N. Y. State Certified Seed of our own growing. See prices on page 32.

Pritchard's Scarlet Topper

TOMATOES continued on next page.

"After 40 years I can truly say there are no seeds like what I get from Harris'. They are surely good."

Andrew McClelland, Chicopee, Mass. April 8, 1939.

TOMATOES—*Continued***New Rutgers Tomato
Harris' Early Strain**

Very few varieties have attained such universal popularity in so short a time as has the Rutgers. Since its introduction a few years ago by Prof. Schermerhorn of the New Jersey Agricultural Experiment Station it has taken a leading place both as a canning and a market kind and deservedly so.

The outstanding features of the Rutgers tomato are the large size and solid structure of the fruit, deep globe shape, fine flavor and deep red color all over together with a heavy set of fruit which makes for high yield.

Although this is a main crop tomato we have selected it for earliness, producing a strain which is only a little later than Scarlet Topper, without losing any of its other fine characters. The vines are strong and sturdy with plenty of leaves to prevent the fruit being scalded by the sun.

N. Y. State Certified Seed of our own growing. See prices on next page.

"I had wonderful luck growing your seeds and plants last season and wouldn't think of having any other kind. I am highly pleased and can't say enough for them where the growing season is as short as it is here, they couldn't grow any finer or better crops than they did for me last year; and I sincerely feel that if you charge twice what you do for them they would still be worth it."

Jackson Young, Liberty, N. Y. March 27, 1939.

CUPROCID 54-Y

New Yellow Copper Oxide — Equal to Bordeaux for control of blight and leaf spots. Avoids lime injury. Spray your tomato plants in the seed bed and field. Economical. See page 48. Circular mailed on request.

Rutger's Tomatoes

Photo taken in one of our fields of New York State Certified seed.

Stokesdale—(N. Y. Certified Seed)

We are pleased to offer for the first time this year, N. Y. State Certified seed of this promising new variety. This seed was grown on our own farm, and carefully rogued to meet the requirements of the inspectors for N. Y. State certification.

Stokesdale is a medium size deep globe tomato, very solid, of fine quality and very prolific. The fruit is of excellent deep color, coloring well all over. In season it is medium early ripening about with Bonny Best. Because of its good quality and very heavy yield we believe this tomato has a place for market, shipping and canning. Try some this year.

N. Y. State Certified Seed of our own growing. See prices on next page.

Marglobe Tomato—Blight Resistant

We have grown this variety on our own farm since it was first released by the U. S. Department of Agriculture a number of years ago and have made careful selections each year to improve the yield, uniformity of color, size and shape of fruit.

The fruit is large, globe shaped, perfectly smooth, deep red, very solid and firm. This is also a standard variety for green pack, as it grows with very little stem crack and ripens well in storage. The vines are vigorous and healthy and do not blight, remaining green until frost, so the late fruit is as good as the first to ripen.

N. Y. State Certified Seed of our own growing. See prices on next page.

Comet Tomato

N. Y. Certified—For Greenhouse and Trellis Growing

Our stock is used regularly by some of the largest and best growers of greenhouse and trellis fruit. We are pleased to offer **N. Y. State Certified Seed** of this fine strain of Comet Tomato. The seed is saved only from the best fruit and has been found superior for both greenhouse use and growing outside on supports. Pkt. 20c; $\frac{1}{8}$ oz. 50c; $\frac{1}{2}$ oz. \$1.65; oz. \$3.00; $\frac{1}{4}$ lb. \$10.00.

Golden Globe—(New Yellow)

Deep golden yellow, true globe. Large thick meated and prolific. See full description in our Retail Catalogue. Pkt. 15c; $\frac{1}{4}$ oz. 25c; oz. 65c; $\frac{1}{4}$ lb. \$2.00.

TOMATOES continued on next page.

John Baer
Tomatoes

Part of a cluster of fruit from our seed fields.

TOMATOES—Continued

John Baer—Improved Strain

The Best Tomato in Its Class

This is the Geneva strain of John Baer tomato and will produce larger fruit and more tons of fine tomatoes to the acre than any stock we have ever seen.

The fruit is unusually large for this variety. It is very smooth and is deep red throughout, coloring right up to the stem. The vines are vigorous and healthy and produce heavy crops.

We regard this Improved John Baer as one of the best medium early tomatoes, and can recommend it most highly both for market and canning.

N. Y. State Certified Seed of our own growing. See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.
BONNY BEST. Harris' Special Strain. (N.Y. Certified Seed) 5 lbs. \$20.00	\$.50	\$1.35	\$4.50
We know of no finer strain. Grown on our own farm from our own pedigree stock seed. Produces smooth round perfect fruit of finest color.			
BREAK O'DAY. (N.Y. Certified Seed)50	1.50	5.00
The fruit is very early, globe shaped, smooth and solid. This tomato is valuable where plants are staked and early fruit of high quality is required.			
CANADIAN. Extra Early. (N.Y. Certified Seed)50	1.50	5.00
A robust Earliana type tomato, practically as early as our Special Strain. Fruit deep red color and large. Seed of our own growing.			
COMET. Forcing Tomato. (N.Y. Certified Seed.) See prices on page 31
Dwarf Champion50	1.30	4.25
Early, pink, medium size, dwarf stocky plant.			
Dwarf Stone50	1.35	4.50
Plants like Dwarf Champion with fruit like Stone.			
EARLIANA. Harris' Extra Early Strain. (N.Y. Certified Seed)50	1.50	5.00
Our stock is famous for extremely early, extra smooth fine colored fruit. Other tomatoes under various names are said to be earlier, but few are and these are for the most part very irregular in shape and poor for market.			
EARLY DETROIT. The Best Early Pink Tomato.50	1.30	4.25
A very fine pink variety with smooth, evenly colored fruit of good size.			
GOLDEN QUEEN50	1.45	4.75
Large, smooth yellow fruit.			
GOLDEN GLOBE. (New). See page 31 Pkt. 15c; $\frac{1}{4}$ oz. 25c	.65	2.00	. . .
HARRIS' EARLY STONE. (N.Y. Certified Seed) 5 lbs. \$18.50	.50	1.30	4.25
Produces large, solid deep red fruit, superb quality. Early selected strain, ripens nearly as early as Bonny Best and John Baer. Enormous cropper.			
ITALIAN RED PEAR. Pomo d'oro a Pero. (N.Y. Certified Seed) Pkt. 10c	.50	1.50	5.00
Three to four times as large as ordinary Red Pear. Clusters of 4 to 7 fruit with pleasant distinct flavor. Used largely for Tomato "paste" and canning "Italian Style."			
JOHN BAER. Improved Strain. (N.Y. Certified Seed). See above . . . 5 lbs. \$20.00	.50	1.35	4.50
MARGLOBE. Blight Resistant. (N.Y. Certified Seed). See page 31 . 5 lbs. \$22.50	.50	1.50	5.00
NYSTATE (NEW). (N.Y. Certified Seed) 5 lbs. \$20.00	.50	1.35	4.50
An excellent market and canning variety, smooth slightly flattened globe. Resistant to cracking. Deep red color, solid flesh, superior quality. Ripens about with John Baer.			
PONDEROSA. Largest Pink Kind.55	1.60	5.50
Magnificent, heavy, solid fruit, often weighing 2 lbs. or more; light pink; medium late; does not color very well and is somewhat irregular.			
PRITCHARD'S SCARLET TOPPER. (N.Y. Certified) See pg. 30. 5 lbs. \$22.50	.50	1.50	5.00
REDCAP. New.50	1.50	5.00
Developed by the New York State Agricultural Experiment Station at Geneva. Prolific and early, with solid fruit of remarkably fine color and superb quality.			
RUTGERS (New). (N.Y. Certified Seed). See page 31 5 lbs. \$27.50	.60	1.75	6.00
STOKESDALE (New). (N.Y. Certified Seed). See page 3160	1.75	6.00

Small Fruited Tomatoes

These little tomatoes are popular to use in pickles, salads and preserves.

Varieties: Red Cherry, Red Pear, Red Plum, Red Currant, Yellow Cherry, Yellow Pear, Yellow Plum, and Ground Cherry (Husk).

Price: Pkt. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c; $\frac{1}{4}$ lb. \$1.50. Any four Pkts. 25c. Any four $\frac{1}{2}$ oz. \$1.00.

Harris' Tomato Plants

We have a reputation for producing fine, sturdy, true to name tomato plants. They can be furnished either ready to set out in the open ground, or, if preferred, small plants which can be grown in frames for a few weeks before setting out. See page 35 for prices and varieties.

Harris' Purple Top White Globe Turnip

TURNIPS

Weisse Rube (Ger.) Navone (It.)
It requires 1 to 1½ lbs. of seed per acre in drills,
or 2 to 2½ lbs. broadcast.

Purple Top White Globe
Special Strain

This stock of Purple Top White Globe turnip continues to produce the smoothest, handsomest turnips we have ever seen. The turnips are a snowy white with bright purple tops. It costs no more to grow these fine turnips and their attractive appearance makes them sell much better. See prices below.

Be Sure Your Name and Address
is on the Order Sheet.

	¼ lb.	lb.	10 lb.
EARLY PURPLE TOP MILAN.....	\$.30	\$.85	\$8.00
The earliest purple top turnip, very fine. Flat.			
EARLY WHITE MILAN. The Earliest Turnip.....	.30	.85	8.00
Very early, flat white turnip.			
GOLDEN BALL. The Smoothest Yellow Turnip.....	.25	.75	7.00
Round, smooth yellow. Much the best to grow where a yellow turnip is wanted.			
PURPLE TOP WHITE GLOBE. Special Strain. See above.....	.25	.70	6.50
SHOGOIN. The Best Foliage Variety.....	.25	.80	7.50
The best turnip for greens, very much superior to Seven Top. The turnips are white, flat and of fine quality. The tops are light green of good quality and grow in clusters.			
Snowball.....	.25	.70	6.50
Pure white, round as a ball; early, with small tops.			

Kohlrübe (Ger.) RUTA BAGAS or Swede Turnips Cavolo navone (It.)
Improved Long Island
Special Neckless Strain

We have compared this stock with the finest Canadian varieties and find it superior to any we have yet seen.

The roots are large and handsome producing enormous crops. They are globe shape and much smoother than the usual strains. There are practically no necks. Flesh is yellow and of fine quality. These ruta bagas command the best prices.

¼ lb. 30c; lb. 85c; 10 lbs. \$8.00.

Macomber
Finest Quality—White Flesh

This ruta бага should be grown more extensively. It is the finest quality ruta бага we know, being exceptionally mild and sweet. The roots are nearly round smooth, white with green tops. The flesh is white and very fine grained. Growers with discriminating customers quickly work up a fine trade with this outstanding variety.

¼ lb. 60c; lb. \$2.00; 10 lbs. \$19.00.

Improved Long Island Ruta Bagas

Early Yellow Purple Top—Famous Bucks County Strain

A fine strain of Purple Top Yellow ruta bagas maturing about two weeks earlier than Long Island Improved. The roots are somewhat smaller and slightly flatter than that variety. They are very uniform for shape and color. The flesh is light yellow, fine grained and sweet. We recommend this variety particularly for the early market. ¼ lb. 35c; lb. \$1.10; 10 lbs. \$10.00.

VEGETABLE PLANTS and ROOTS

Orders for plants will be entered at any time and the plants sent when ready or when it is time to set them out.

For those who use vegetable plants in large quantities *if ordered before Feb. 15th*, we can grow to your order at special prices. *Write for quotations on your requirements.*

PLEASE NOTE: Our plants are expertly and carefully packed so that they will reach you in good condition, but if they are delayed on the road or for any other reason, they arrive in poor shape, let us know at once and we will replace them. We cannot be responsible for the plants living after they are planted as this depends on how they are planted and the soil and weather conditions over which we have no control.

At the prices given below the plants are sent at the expense of the purchaser. If plants are wanted by parcel post an extra charge is made for postage as follows: To places in the 2nd zone (150 miles) 1c per lb., 3rd zone 2c per lb., 4th zone 4c per lb., 5th zone 6c per lb. 50 plants are furnished at the 100 rate, 500 at the 1000 rate.

For prices in quantities less than listed here see our retail catalogue.

See our Retail Catalogue for complete descriptions of these and other fine lawn grass mixtures.

FLOWER SEEDS

Enchantress Pink Aster

Ageratum

Probably few other flowers are as diversified in their uses. The new variety **Blue Ball** is an excellent kind to either pot for spring trade, or to sow in November or December for Easter trade. **Little Blue Star** is a most satisfactory dwarf edging variety to use for bedding plant trade, while **Swanley Blue**, being taller, makes a valuable cut-flower.

HARRIS' ASTERS—New Wilt-Resistant Varieties

You, as a commercial grower cannot afford to gamble unnecessarily. Sow only "Wilt-Resistant Asters" and eliminate the risk of "wilt" or "stem rot."

If you are growing for cut-flowers we particularly recommend the *New Early Giants*, *Crego* *Enchantress Pink*, *Shell Pink*, *Purple*, and *White*, *Peerless Pink*, *American Branching Azure Blue*, *Rose* and *White*.

We would also urge you to try *Harris' New Early Dawn* in separate colors, and *Pompon Asters* in mixture. They both prove profitable in desirable locations and are well worth trying.

For a spring plant trade we find the best sellers are *Peerless Pink*, *Heart of France*, *American Branching White*, *Azure Blue*, *Rose*, and *Purple*. Some trade also demands *Crego Asters* in which case we recommend sowing *Crego Azure Blue*, *Enchantress Pink*, *Shell Pink*, and *White*.

Crego Asters

Ostrich Feather Asters. An unusual range of colors selected from the best of the fluffy or Crego type.

	Lg.	Pkt.	¼ Oz.	Oz.

W1601—White.....				
W1600—Variety Mixture.....				.15 .40 1.25

New Early Giant Asters

A much earlier, and wilt-resistant strain of the immense California Giant Asters.

	Lg.	Pkt.	¼ Oz.	Oz.
W1824—Light Blue.....	\$.35	\$.85	\$3.00	
W1823—Peach Blossom.....				

Peerless Pink Aster

W1066—This is still the most profitable light pink Aster. Large double flowers on vigorous branching plants. Lg. Pkt. 25c; ¼ Oz. 45c; Oz. \$1.60.

Heart of France Aster

W1078—The most popular "red" Aster and still a favorite for the gardens. There is no other Aster to take its place. Lg. Pkt. 25c; ¼ Oz. 60c; Oz. \$2.00.

ASTERS—Continued

Although the following Asters are not listed as "Wilt-Resistant" they are particularly good growers and should not be troubled by wilt unless grown in badly infected soil.

Harris' Early Dawn Asters

A new class of extra early Asters of our own growing. They bloom so early that, with us, they are not affected by the tarnished plant bug or diseases. We grow them from seed without transplanting.

Better and earlier than Queen of the Market.

	Lg.	Pkt.	¼ Oz.	Oz.
W1254—Lavender.....	\$.25	\$.45
W1253—Rose.....				
W1251—White.....				
W1250—Variety Mixture.....

W1811—White.....					
W1810—Variety Mixture.....		.25	.60	2.00	

New Pompon Asters

W1100—A new type rapidly gaining popularity for cutting. Upright growing plants with an abundance of small tightly doubled flowers that last for a long time. Mixed Colors. Lg. Pkt. 35c; ¼ Oz. 85c; Oz. \$3.00.

All Kinds Mixed

W1000—Choice Mixture of Tall Varieties. This is an especially made mixture of all taller growing kinds. Lg. Pkt. 15c; ¼ Oz. 30c; Oz. 90c; ¼ Lb. \$2.70.

Calendula, Chrysantha

Candytuft, Giant Hyacinth-flowered

Calendula

For those who have not been getting good blooms during the summer, we recommend sowing later (June 20th to July 1st). They will start flowering the last of August and continue throughout September and October. You will find the flowers comparing favorably with greenhouse grown stock in size and length of stem.

Larkspur

The finest Larkspur for outdoor cutting is probably produced by sowing seed outdoors the middle of August. However, sowings may, in some cases, be made as late as October. Plants will usually withstand the winter in this latitude without any mulch.

Giant Imperial

- W3248—Los Angeles Improved. Salmon rose
W3254—Blue Bell. Mid blue
W3255—Adorable. Lilac lavender
W3256—White King. Large white
W3258—Blue Spire. Deep violet blue
W3253—Dazzler. Rich scarlet

Any of the above colors: Lg. Pkt. 15c;
¼ Oz. 30c; Oz. 90c; ¼ Lb. \$2.70.

- W3250—Variety Mixture. Our own mixture of the above named six best kinds. Lg. Pkt. 15c; ¼ Oz. 25c; Oz. 75c; ¼ Lb. \$2.25.

Harmony Marigold

Marigolds

The Marigold fulfils the florist's desire for a flower which, at a minimum of cost, adapts itself to almost every use. They are being used more extensively each year for colorful spring combination pots by making January and February sowings. Harmony is the best for this purpose. It is a two-tone double flower on a dwarf early flowering plant. For taller work we suggest the odorless Crown of Gold. For growing under cloth, on a greenhouse bench, or out-of-doors, Yellow Supreme and odorless Burpee Gold are the most popular. These can be followed up by the larger African varieties. We urge you to try our new extra early Viking Marigolds. Of course, all varieties sell well to the plant trade.

TALL MARIGOLDS

Carnation-flowered Marigolds

Large wide-petalled flowers, very attractive and popular for cutting.

	Lg. Pkt.	¼ Oz.	Oz.
W3426—Yellow Supreme	\$.15	\$.35	\$1.00

Petunias

Petunias are probably the most widely used flower in America today. We believe that our list is so carefully selected from our own plantings that it will give you the best varieties for all uses. We have also attempted to group them in order to eliminate confusion.

Harris' Paramount Giant Petunias flower early on small plants

Giant Ruffled Petunias

W3802—Paramount Giants, Mixed Colors. (Harris Grown.) An extra fine strain of our own growing especially selected for florists' use. The immense deep-throated well ruffled flowers are on low-growing compact plants that do not run up tall during the summer. They start flowering when the plants are very small, making them exceptionally good for spring sales. The colors are selected for brightness and include a large percentage of red and white blotched.

500 seeds 60c; 1000 seeds \$1.00; $\frac{1}{64}$ Oz. (about 2500 seeds) \$2.00; $\frac{1}{32}$ Oz. \$3.50; $\frac{1}{16}$ Oz. \$6.50; $\frac{1}{8}$ Oz. \$12.00.

W3801—Ruffled Giants of California. Not as dwarf in habit, but bearing ruffled flowers of a splendid color range in Giant Petunias. $\frac{1}{64}$ Oz. (2500 seeds) 75c; $\frac{1}{32}$ Oz. \$1.25; $\frac{1}{16}$ Oz. \$2.25; $\frac{1}{8}$ Oz. \$4.25; $\frac{1}{4}$ Oz. \$8.00.

W3803—Florist's Supreme Strain. Large ruffled flowers of the California Giant type in a new array of colors, including the beautiful salmon and pink shades found in no other strain of Giant Petunias. This makes them unusually good for florists. 500 seeds 60c; 1000 seeds \$1.00; $\frac{1}{64}$ Oz. \$2.00; $\frac{1}{32}$ Oz. \$3.50; $\frac{1}{16}$ Oz. \$6.50; $\frac{1}{8}$ Oz. \$12.00.

W3806—Dwarf Ruffled Giant. Mixed colors. Not our own growing. Very good large ruffled flowers on low growing plants. Exceptional value. $\frac{1}{32}$ Oz. \$1.50; $\frac{1}{16}$ Oz. \$2.50; $\frac{1}{8}$ Oz. \$4.50; $\frac{1}{4}$ Oz. \$8.50; $\frac{1}{2}$ Oz. \$16.00.

W3808—Ruffled Salmon Beauty (Harris grown). The only giant bright salmon-pink. Immense well ruffled flowers with golden throat. An excellent florist's variety. 500 seeds 60c; 1000 seeds \$1.00; $\frac{1}{64}$ Oz. \$2.00; $\frac{1}{32}$ Oz. \$3.50; $\frac{1}{16}$ Oz. \$6.50.

All-Double Petunias

From our experience these have proved to be the *only 100% All-Double* Petunias. The varieties we are offering are all of the "Victorious" or Dwarf Fringed type, and we have selected the most desirable colors.

Double Petunias make excellent 4 to 5 inch pot-plants for Easter and Mothers' Day if the seed is planted in the early winter. They always sell well, either in flats or pots, for spring bedding plants.

Victorious All-Double

	500 seeds	1000 seeds	$\frac{1}{64}$ Oz.	$\frac{1}{32}$ Oz.
W3790—Mixed Colors.....	\$.85	\$1.50	\$6.00	\$11.00
W3797—Madonna, White...	1.25	2.00	6.50	12.50
W3794—Amaranth Red.....	1.25	2.00	6.50	12.50
W3793—Carmine King (World Beauty). The original all-double pink Petunia and still the best. Very dwarf and compact and true to color. 500 seeds \$1.25; 1000 seeds \$2.00; $\frac{1}{64}$ Oz. (about 5000 seeds) \$6.50; $\frac{1}{32}$ Oz. \$12.50.				

Large Flowered Waved and Fringed Petunias

From all the different fringed and waved Petunias we grew on our farm last year, we finally selected these as being the best.

Prices of the varieties described below: 500 seeds 40c; 1000 seeds 75c; $\frac{1}{64}$ Oz. \$1.50; $\frac{1}{32}$ Oz. \$2.75; $\frac{1}{16}$ Oz. \$5.00; $\frac{1}{8}$ Oz. \$9.00.

W3816—HARRIS' PURPLE PRINCE. Our own growing, and not to be confused with any other "Purple Prince" offered. This is distinctly different. The largest flowered, deep, velvety violet-blue. Large open throats and waved petals. Very free flowering.

W3814—GIANT SNOWSTORM. (Harris grown.) An exceptionally fine strain of this magnificent low-growing glistening white.

W3807—DAINTY LADY. Dwarf plants with fringed creamy yellow flowers in abundance.

W3817—THE ART. The brightest colored strain of fringed Petunias we have ever seen. The flowers are thoroughly fringed and all in bright pink and red blotched white. Your customers will like them.

W3812—MARTHA WASHINGTON. A very dwarf compact plant covered with fringed blush-pink flowers veined wine-red.

W3813—THEODOSIA. We know we have the best strain of this popular bright pink with yellow center. Large and well fringed.

W3818—SCARLET GLORY. The most brilliant color. Many flowers with waved petals. Dwarf plants.

W3811—SETTING SUN. Fringed pink on extra dwarf plants.

TWO NEW 1940 ALL-AMERICA WINNERS

W3843—GLOW (Silver Medal). Low growing, large flowered, and the brightest deep pink of all Petunias. Retail Pkt. 25c; $\frac{1}{64}$ Oz. \$1.00.

W3844—CREAM STAR (Silver Medal). A new creamy-white on compact plants of exceptional uniformity. Retail Pkt. 25c each.

Salmon Supreme Petunia

Single Low-growing BEDDING PETUNIAS

This is the most popular class of Petunias for outdoor bedding and are the leaders for plant sales in pots and flats.

Petunias being one of our specialties, we make every possible effort to offer only the best possible strains of the most desirable colors, testing them carefully for growth and color.

W3826—CELESTIAL ROSE. The finest all-purpose bright pink. A more attractive shade and more compact growing than Rose of Heaven. A clear pink without the large white throat of Rosy Morn. This is the most compact and uniform growing strain. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 50c; $\frac{1}{4}$ Oz. 85c; Oz. \$3.00.

W3827—HEAVENLY BLUE, Improved. This is the light blue so much in demand for plants but generally very variable in color. This year we are finally able to offer a much improved strain. In the field, the color was true clear light-blue and the plants uniformly low and compact. We sincerely believe this is far superior to any other Heavenly Blue on the market. Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 65c; $\frac{1}{4}$ Oz. \$1.20; Oz. \$4.00.

W3828—HEAVENLY BLUE. Ordinary Strain, as generally offered. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 35c; $\frac{1}{4}$ Oz. 60c; Oz. \$2.00.

W3825—DARK PURPLE. A very much improved stock, more compact growing and a deep velvety dark blue-purple. As low growing as Celestial Rose. Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 60c; $\frac{1}{4}$ Oz. \$1.00; Oz. \$3.50.

W3821—SNOWBALL. A new white, more uniform in growth and of the same compact habit as Celestial Rose. Most white Bedding Petunias offered are much taller and show pink markings. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 45c; $\frac{1}{4}$ Oz. 75c; Oz. \$2.50.

W3823—ROSY MORN. The popular bright pink with large white center. Slightly taller growing than Celestial Rose. This is the best stock obtainable. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 35c; $\frac{1}{4}$ Oz. 60c; Oz. \$2.00.

W3829—ELEANOR BLUE (crop failure). The nearest substitute in a medium blue color is the taller growing "Blue Bee," see New King Petunias.

W3841—BLUE STAR (New). Low, compact growing plants with dark blue flowers marked and starred white. Our tests showed them to be well starred. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 45c; $\frac{1}{4}$ Oz. 75c; Oz. \$2.50.

W3840—HARRIS' SPECIAL FOUR-COLOR MIXTURE. Here is an unusually fine mixture especially made up for particular buyers. We make this mixture from the same fresh, new-crop seed described above, using carefully balanced proportions of Celestial Rose, Snowball, Dark Purple and Heavenly Blue, Improved. Uniform in growth and unequalled for colors. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 50c; $\frac{1}{4}$ Oz. 85c; Oz. \$3.00.

W3805—Variety Mixture. A good mixture of many different varieties. Lg. Pkt. 15c; $\frac{1}{4}$ Oz. 45c; Oz. \$1.50.

Petunias That Are Different

W3836—HARRIS' BLACK PRINCE. An improved strain of our *own growing*. A dwarf "Flaming Velvet" similar to "Velvet Ball." The color is the darkest red it is possible to imagine, while the plants are uniformly compact growing. We found it to be one of the best selling Petunias in the spring plant trade. $\frac{1}{8}$ Oz. 35c; $\frac{1}{4}$ Oz. \$1.00; $\frac{1}{2}$ Oz. \$3.50.

W3822—SALMON SUPREME. The new true salmon bedding Petunia of our *own growing*. Gold Medal All-American winner for 1938. Very low and compact and a pleasing shade. $\frac{1}{8}$ Oz. 75c; $\frac{1}{4}$ Oz. \$2.00.

W3845—BALCONY BLUE. A tall growing, free-flowering deep velvety purple-blue. A standard blue that always sells well. Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 65c; $\frac{1}{4}$ Oz. \$1.10; Oz. \$4.00.

W3774—HOLLYWOOD STAR. The new star-shaped pink Petunia that won the Silver Medal in the 1939 All-America Selections. Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 60c; $\frac{1}{4}$ Oz. \$1.00; Oz. \$3.50.

W3842—LADY BIRD. A new low growing bright scarlet. The only Petunia of this color. An All-America winner in 1939. 1000 seeds 40c; $\frac{1}{8}$ Oz. \$1.00; $\frac{1}{4}$ Oz. \$3.50.

W3824—TOPAZ ROSE. The deepest pink Bedding Petunia with a golden throat. Taller than the other "Low-Growing Bedding Petunias." A very showy and pleasing color and free bloomer. Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 60c; $\frac{1}{4}$ Oz. \$1.00; Oz. \$3.50.

Pansies

New Swiss Giants

W3705—MAGNIFICENT MIXTURE. By actual tests every year on our farm, this strain of mammoth-flowered Pansies has proved to be the best. The color range includes the dark browns and reds as well as the bright shades, and is the choice of Pansy critics. Lg. Pkt. 40c; $\frac{1}{8}$ Oz. 80c; $\frac{1}{4}$ Oz. \$1.50; Oz. \$4.50; $\frac{1}{4}$ Lb. \$12.00.

W3704—DWARF SWISS, Choice Mixture. More dwarf compact plants with the same immense flowers as the Magnificent Mixture. Lg. Pkt. 40c; $\frac{1}{8}$ Oz. 90c; $\frac{1}{4}$ Oz. \$1.65; Oz. \$5.00.

W3738—NEW BLUE SWISS. A solid blue with darker blue blotch. Lg. Pkt. 40c; $\frac{1}{8}$ Oz. 90c; $\frac{1}{4}$ Oz. \$1.65; Oz. \$5.00.

W3739—NEW RED SWISS. Same type as the Blue, but a mahogany red color. Lg. Pkt. 40c; $\frac{1}{8}$ Oz. 90c; $\frac{1}{4}$ Oz. \$1.65; Oz. \$5.00.

W3736—NEW YELLOW SWISS. A giant yellow with black blotches. Lg. Pkt. 40c; $\frac{1}{8}$ Oz. 90c; $\frac{1}{4}$ Oz. \$1.65; Oz. \$5.00.

W3737—CORONATION GOLD. A new Swiss Giant Pansy of pure yellow with no markings. Very compact plants which withstand summer heat exceptionally well. Lg. Pkt. 50c; $\frac{1}{8}$ Oz. \$1.00; $\frac{1}{4}$ Oz. \$1.75; Oz. \$6.00.

Maple Leaf Giants

W3703—Mixed Colors. The largest flowers of all Pansies. Blue and yellow shades predominating on long stems. Lg. Pkt. 50c; $\frac{1}{8}$ Oz. \$1.00; $\frac{1}{4}$ Oz. \$1.75; Oz. \$6.00.

Giant Trimardeau Pansies

W3701—Mixed Colors. A high grade mixture of choicest colors of large-flowering Pansies. Lg. Pkt. 15c; $\frac{1}{4}$ Oz. 30c; Oz. \$1.00; $\frac{1}{4}$ Lb. \$3.00.

Harris' Special Market-Color Mixture

W3710—A special mixture of large-flowered Pansies made up of equal amounts of the following favorite bright colors: Orchid, Light Blue, Pure White, Pure Yellow, Bright Red, Black, and Orange. $\frac{1}{8}$ Oz. 30c; $\frac{1}{4}$ Oz. 50c; Oz. \$1.50; $\frac{1}{4}$ Lb. \$4.00.

SEPARATE COLORS—We can supply any of the above named colors separately for $\frac{1}{8}$ Oz. 40c; $\frac{1}{4}$ Oz. 70c; Oz. \$2.00.

Harris' Special Mixture

W3700—Here is a new mixture of very large-flowered Pansies, with slightly waved petals and in an unusually bright and pleasing range of colors, including many "pastel" shades. According to our tests they start flowering earlier in the spring and continue all summer. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 35c; $\frac{1}{4}$ Oz. 65c; Oz. \$2.25; $\frac{1}{4}$ Lb. \$6.00.

Salvia

W4600—Harris' Bonfire. With the florist, the name of Harris has become synonymous with superior quality and high germinating Salvia seed. Our own special strain of Bonfire Salvia which we recently introduced has met with increasing popularity. The spikes are larger, longer, and the florets placed more closely together. The growth is as uniform as though it had been sheared. The color is of a brighter shade than any other variety.

The most economical. Due to the unusually high germination, Harris' Bonfire Salvia has proved to be more economical to sow than lower priced varieties.

SPECIAL PRICE REDUCTION

Due to an exceptionally good yield of seed this year, we are able to lower the price for 1940.

Lg. Pkt. 25c; $\frac{1}{4}$ Oz. 75c; Oz. \$2.50; $\frac{1}{4}$ Lb. \$7.00; Lb. \$21.00.

W4601—Splendens. The quality of our regular strain of Splendens Salvia is not to be overlooked where a cheaper variety is demanded. We find it is better than ordinary Splendens Salvia in earliness and growth. Lg. Pkt. 15c; $\frac{1}{4}$ Oz. 40c; Oz. \$1.25; $\frac{1}{4}$ Lb. \$4.00.

W4602—Dwarf Harbinger. If you want an extra early blooming variety to flower in pots in the spring we strongly recommend our Harbinger. This is a low-growing, free-flowering variety with high germinating seed. Lg. Pkt. 35c; $\frac{1}{4}$ Oz. \$1.15; Oz. \$4.00.

W4603—Farinacea, Blue Bedder. Long spikes of light blue. Grow by same method as Bonfire. Lg. Pkt. 25c; $\frac{1}{4}$ Oz. 65c; Oz. \$2.25.

Snapdragons

For outdoor and cloth house, cutting and plant sales, use the Tall Giant Flowered.

Our Snapdragons have all been chosen from the newest introductions and only the most popular colors are offered.

Tall Giant Flowered Snapdragons (Rust-Resistant)

For every use and from every point of view these are the finest Tall Snapdragons we can find. They are American grown, and fresh seed of high germination. The flowers are large and well placed on stems growing 2 to 2½ feet high. For plant trade, the seed is usually started in early February.

W5051—Pure White.....	Lg.	
W5052—Autumn Glow. Beautiful terra-cotta pink.....	Pkt. $\frac{1}{8}$ Oz. $\frac{1}{4}$ Oz. Oz.	
W5053—Bright Rose.....		
W5054—Wallflower Red. Brown and red combinations	\$.25 \$.35 \$.65	\$2.25
W5055—Crimson. Deep red with dark foliage.....		
W5056—Orange.....		
W5057—Canary Yellow.....		

W5050—Variety Mixture. Our own special mixture, using proper amounts of the seven colors. An exceptional mixture for plant trade. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 35c; $\frac{1}{4}$ Oz. 60c; Oz. \$2.00.

Half-Tall Snapdragons

W5115—New-Color Mixture. Here is something special in a mixture of Half-Tall (18-24 inches) Snapdragons. It is a mixture we make by using the light and unusual colors. Might be called a "Pastel Mixture." It is only the yellow, pink, orange and rose shades with their variations, and will be most pleasing in the garden. Good for plant trade. Lg. Pkt. 15c; $\frac{1}{4}$ Oz. 40c; Oz. \$1.25;

Sweet Peas

Early Flowering

Ruffled Sweet Peas

W7600—Mixed Colors. A new type with large wavy petals and including a wide range of beautiful colors. Oz. 15c; $\frac{1}{4}$ Lb. 45c; Lb. \$1.50.

ZINNIAS

Each year we try nearly all of the different kinds and colors of Zinnias in order to be sure to offer you only those we find to be the best.

For out-door cut flowers we urge you to use our Giant “Two-Tone” Zinnias, the color range is ideal. Fantasy Zinnias are also increasing in popularity for cutting.

The most extensive use for Zinnias is in growing plants in “flats” for spring sales. Sow seed in early April. The Giant Flowered are the most popular and there is an increasing demand for separate colors. Pompom Zinnias are next in popularity.

A New Giant Zinnia Mixture

W8160—Giant “Two Tone” Zinnias, Light-Color Mixture. A new race of giant flowers in unusually beautiful color combinations of the pastel shades. Be sure to sow some of these new Zinnias for your plant trade. Lg. Pkt. 25c; $\frac{1}{4}$ Oz. 60c; Oz. \$2.00; $\frac{1}{4}$ Lb. \$6.00.

New Pompon Zinnias

This new race of Zinnia is especially good for cut flowers. The flowers are small, full double and borne in profusion eight weeks from sowing.

HARRIS' HARDY PERENNIAL SEED

Our list of hardy perennial flowers includes only those varieties really hardy in the North and those kinds that are the best for plant trade, as well as for cut-flowers. The seed is largely of our own growing and is all of the highest germination.

INSECTICIDES, ETC.

All articles on these two pages are sent at purchaser's expense except where noted.
Prices quoted are as of Dec. 1, 1939 and are subject to change without notice and to stocks being unsold.

ARSENATE OF LEAD. Standard poison to use against worms and insects that eat leaves of plants, fruits, etc.

Powder: 1 lb. package 45c; transportation paid.
Not paid: 4 lb. bag \$1.10; 6 bags (24 lbs.) or more at 19c per lb.

"BLACK LEAF 40." Standard nicotine sulphate insecticide. Highly concentrated. Economical.

1 oz. 35c; 5 oz. \$1.00; 1 lb. (bottle) \$2.25; 2 lb. (tin) \$3.25 transportation paid. Not paid: 5 lbs. \$5.85; Prices subject to change. Write for prices on larger sizes.

BORDEAUX MIXTURE. Standard fungicide for spraying plants and trees.

1 lb. 45c; transportation paid. Not paid: 4 lb. bag \$1.00; 6 bags (24 lbs.) at 17c per lb.

Write for prices on larger quantities.

CALOMEL and CORROSIVE SUBLIMATE. Due to war conditions, prices of these chemicals have advanced greatly, and are too unstable to list here. We shall be glad to quote latest prices at any time.

NEW EVERGREEN. One of the most effective non-poisonous insecticides. Contains soap spreader.

1 oz. 35c; 6 oz. \$1.00; 16 oz. \$2.15 transportation paid. Not paid: 1 gal. \$12.20.

FORMALDEHYDE, (40 per cent). A valuable disinfectant for destroying germs that cause diseases in plants. Directions on can.

1 lb. 40c; 6 cans \$2.15 postpaid; also 100 lb. Carboys (about 12 gal.) and 450 lb. barrels (50 gal.) Write for special price.

SEMESAN. We have found this material most reliable to prevent damping off of seedlings. Used either as liquid for treating soil or dust disinfectant for seeds.

$\frac{1}{3}$ oz. 10c; 2 oz. 35c; 1 lb. \$2.25 transportation paid. Not paid: 5 lbs. \$10.00; 25 lbs. \$46.00.

SEMESAN Bel. For seed potatoes. One pound New Improved Semesan Bel will treat 50 to 60 bu. of cut potatoes. For control of Rhizoctonia and seed-born Scab.

2 oz. 25c; 4 oz. 50c; 1 lb. \$1.50 transportation paid. Not paid: 5 lbs. \$6.50; 25 lbs. \$30.00.

SEMESAN Jr. A cheap and effective dry dust disinfectant for both field and sweet corn. Prevents corn from rotting in the ground.

2 oz. 15c; 4 oz. 30c; 1 lb. 75c transportation paid. Not paid: 5 lbs. \$3.00.

CERESAN. New Improved. Effective dust for control of covered smut on wheat, oats and barley. $\frac{1}{2}$ oz. treats 1 bu. of seed.

4 oz. 30c; 1 lb. 75c transportation paid. Not paid: 5 lbs. \$3.25.

WEED KILLER. Effective for killing weeds in ditches, roads, etc. Destroys all vegetation.

1 qt. 70c; 1 gal. \$1.75; 5 gal. \$4.75. Purchaser pays transportation. Also supplied in 30 gal. and 50 gal. drums. Write for prices.

Pot Labels and Garden Stakes

Keep a record of the kind and variety of seeds sown, dates, etc.

POT LABELS.	Plain		Painted	
	100	1000	100	1000
4 in. long.....	\$.25	\$1.75	\$.28	\$2.15
5 in. long.....	.25	1.95	.28	2.35

Transportation paid.

GARDEN STAKES. These are good, smooth, white wooden labels of best quality. 100 Plain \$1.25; 100 Painted \$1.40. Transportation paid. Not paid: 1000 Plain \$7.00; 1000 Painted \$8.50. Weight 30 lbs. per 1000.

Parchment Paper

Used by large growers everywhere for wrapping celery, etc. Plain, not printed.

Two sizes 8 x 11 in. and 9 x 12 in. 1000 sheets per box. 8 x 11"—1 box \$1.20; 5 boxes or more at \$1.15. (Wt. 7 lbs.). 9 x 12"—1 box \$1.45; 5 boxes or more at \$1.40. (Wt. 8 lbs.). Purchaser pays transportation. Write for price on larger quantities.

PEAT MOSS

Due to the war situation, foreign Peat Moss is very scarce and the market unsettled at this time. If interested please write for latest information.

Protect Your Seed Corn From Crows

If you are troubled with crows and other birds pulling up your seed corn, treat it with **STANLEY'S CROW REPELLENT**. We use it on our own farm for corn, melons and cucumbers. Will not harm the seed or clog the planter.

Half pt. can (enough for 1 bu.)... \$.60
Pint can (enough for 2 bu.)..... 1.00
Quart can (enough for 4 bu.)... 1.75
Transportation paid.

"NICO-FUME." Powder Pressure-Fumigator (New). This most effective and economical fumigating material for greenhouses is now burned under pressure in special cans in which it is packed. Directions on label. Ask us about "Hand-Directed" Fumigation.

$\frac{1}{2}$ lb. cans 45c each; 6 for \$2.40; 12 for \$4.20; 1 lb. cans 75c each; 6 for \$3.75; 12 for \$7.00 transportation paid.

PYROTE. Unexcelled non-poison Pyrethrum-Rotenone spray. No spreader needed.

1 oz. 35c; 6 oz. \$1.00; pint \$2.00; quart \$3.50; transportation paid. Not paid: 1 gallon \$10.00.

CUPROCIDE (Red Copper Oxide). A very effective and cheap disinfectant for seed. Especially effective for spinach and beets.

4 oz. 35c; 1 lb. can 90c transportation paid. Not paid: 5 lbs. \$4.00. Write for prices on larger quantities.

CUPROCIDE 54. New Red Copper Oxide Spray.

3 lb. bag \$1.10 transportation paid. Not paid: 5 bags or more at 95c per bag.

CUPROCIDE 54 Y. New Yellow Copper Oxide Spray. Replaces Bordeaux. No lime injury. Ask for descriptive leaflet.

3 lb. bag \$1.10 transportation paid. Not paid: 5 bags or more at 95c per bag.

SNAROL. Poison Bait for Cut worms, Sow bugs, Slugs, Snails, etc. Rain or sprinkling will not deteriorate.

$1\frac{1}{2}$ lb. 35c transportation paid. Not paid: 4 lbs. 85c; 15 lbs. \$3.00; 50 lbs. \$8.00. Write for prices on larger quantities.

SULROTE. This new dust combines Sulphur and Rotenone in a most effective non-poisonous dust, for control of lice and worms on cauliflower, cabbage, etc., Mexican beetles, cucumber beetles, etc.

1 lb. can 40c each transportation paid. 5 lb. bags \$1.25; 25 lbs. at 18c per lb.; purchaser pays transportation. Write for prices on larger quantities.

TOBACCO DUST. Fine Powder. Used extensively for dusting plants and for fumigating greenhouses. 5 pounds will fumigate a house 20 x 100 feet.

2 lbs. 35c transportation paid. Not paid: 10 lbs. 50c; 100 lbs. \$4.00.

Raffia—Better than String

Used for heavy bundles of plants, for tying plants to stakes, for budding and grafting and many other purposes. Very economical and costs less than string.

Lb. 40c; 5 lbs. \$1.60 transportation paid. Write for prices on large quantities.

Twist'ems

New Improved Plant Tie. A simpler, quicker, better method. Practical. Send for free samples.

4"—1000, 75c; 5000 at 60c per 1000

8"—1000, \$1.25; 5000 at \$1.10 per 1000, transportation paid. Write for prices on larger quantities.

Rubber Bands

Finest quality, new rubber amber bands. Used for bunching vegetables. Better than string.

Sizes No. 8— $\frac{7}{8}$ "; No. 10— $1\frac{1}{4}$ "; No. 12— $1\frac{3}{4}$ "; No. 27— $1\frac{1}{2}$ "; No. 30—2"; No. 31— $2\frac{1}{2}$ "; No. 32—3".

Please order by number.

1 lb. 80c transportation paid. Not paid: 10 lbs. or more at 75c per lb. Prices subject to change without notice. Lowest prices quoted on large lots.

A Free Trial Sample for You !

If you are not using our Special Northern-Grown Bonfire Salvia, we want you to try it. The germination is 82% and there are 8400 seeds per ounce (12% more than imported seed).

Simply ask for "Trial Packet Bonfire Salvia"
Sufficient seed for 500 seedlings

Our Customers Tell Us

A few unsolicited letters from commercial flower growers:

"After using your seeds for two years, both vegetable and flower, I honestly believe that you have the finest seed on the market, and our customers always come back for more of each." Mr. J. P. D., Fryeburg, Maine.

"As our trade increases for vegetable and flower plants our seed requirements increase, and we have found your seeds to be the best." Mr. S. M. L., Hanover, Penna.

"I wish to tell you that your Hardy Carnations are excellent. We sow the seed as early as we can get at outdoor frames, and transplant to the field as soon as they are large enough. The following year they produce excellent plants and our customers rave over them. Last year they proved a profitable crop." Mr. V. D. U., Erie, Penna.

"I do not know how large you are able to grow the blooms of your Harris Paramount Ruffled Giants, but I have grown them to the size of 6¼ inches in diameter." Mr. T. H. D., Providence, R. I.

"Premier Primroses from your seeds were wonderful this spring. From a 25c packet I sold about \$9.00 worth of plants, and customers raved over them." M. F., Norwich, Conn.

"I had the finest Sweet Peas I have ever grown. I tried to grow good ones for 10 years and this was the first year I succeeded in doing so. New England seems to be a hard place to grow Sweet Peas successfully outdoors, many find. I used New Spencer Varieties Mixed, and was more than pleased with them. I might add also that we had the worst drought in 50 years in this section, and the Sweet Peas were never watered." Mr. N. H. S., West Springfield, Mass.

"We feel that the selection of a seed house, Harris, is certainly to be commended. The germination of your Antirrhinum, Petunias and other early flowers is just about the best we have seen. This stands in sharp contrast to all of our previous experience with seeds bought and sent to us to grow." Mr. A. L., Dorset, Vermont.

"My crop last year of White American Branching Asters brought me a good price in the market." Mr. W. J. C., Stony Point, N. Y.

"The Delphinium I got from you were grand. You can use my name any time you like, for your seeds were grand and true to name." Mr. J. C., Peterboro, Ont.

"The percent marks must have been wrong on your flower seed packages. I am sure every seed you sent me came up." E. L. P., New Haven, Conn.

"I had wonderful Asters from your seed last year, while seed from another seed house, which should have been good as it was higher priced, was a blank. Both seeds had the same treatment." Mr. J. G. M., Morristown, Penna.

"I have always had the most wonderful Snapdragons in the neighborhood and won blue ribbons at flower shows; and have never purchased anywhere but from Moreton Farm during the last ten years." E. L. B., Altoona, Penna.

"Last year I bought a package of your Giant Snapdragon seeds. I had wonderful luck with them and no florist had any prettier or larger blooms than I had." M. H., Trenton, N. J.

"I have grown Stocks for the past two years from your seeds and have found none to equal them." A. J., Jordanville, N. Y.

"We are finding your seeds the best we have ever sown. Sorry we did not know of you years ago." Mr. C. F. K., Oakland, Md.

"Another order will follow later. Have had very good results with your seeds." Mr. C. B., Elmira, N. Y.

"I was more than satisfied with your seeds the past two years, especially the Asters." Mr. H. V. G., Birmingham, Mich.

"We are finding by actual comparison with other seeds that Harris seeds do the very best for us of any we have ever tried." Mr. C. W. R., Neodesha, Kans.

"Our Calendula from you, field grown, were very large last year, and we have many repeat orders that we could not keep up with." Mr. H. E. S., N. Tonawanda, N. Y.

JOSEPH HARRIS CO., Inc.
MORETON FARM **ROCHESTER, N. Y.**

Attention, Flower Growers!

It's to your advantage to buy

Harris' Flower Seeds

for your Plant Trade

We know this is true, because every spring, we too, grow large quantities of flower plants for retail sales, and realize you cannot build customers unless your plants are better than your competitor's. To do this you must start with the right seed.

It is impossible for your customers to be any more critical than ours—we must have exceptional quality. To do this, our Flower Seed Department is continually working to develop better types for this particular trade.

We know our Paramount Ruffled Giant Petunias are what you want. Not only are the flowers immense and bright colored, but the plants are low growing, even throughout the hot weather. This is an advantage to both your customers and to you, especially when selling in pots.

Our Giant Purple Prince Petunia is increasing in popularity with growers and their customers as fast as we can produce the seed, because, like our "Paramount Ruffled Giants," every flower must be hand-pollinated. This is slow, tedious work.

We grew a new giant white Petunia this year called Giant Snowstorm. The flowers are immense, well waved, and the plants remain very low all summer. Our own Black Prince (or Improved Dwarf Flaming Velvet) sells well in the plant trade. It has the advantage of showing flowers while the plants are still in boxes.

Although we have been specializing in Petunias, they are by no means the only flower seeds we grow. There is our Northern-Grown Bonfire Salvia, larger flowered and better germinating; Early Dawn Asters, the earliest for cutting; Delphinium, flowers and vigor are exceptional; Foxglove, our new pastel colors; Lupins, unusual colors growing well in most any location; Hardy Carnations, excellent for Memorial Day plant trade; Pyrethrum, Scabiosa; and so on down through a long list.

Most important, however, is the immense amount of work being done "behind the scenes" by our Flower Seed Department under the supervision of Schuyler Arnold.

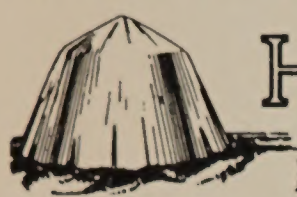

All of our flowers are carefully tried out here on Moreton Farm to make sure each variety is unsurpassed for its use in this climate. Besides they are regularly inspected in the field during their growing season.

A suggestion—Mr. Arnold is always glad to answer your questions. Why not write him?

Early Crops Get Highest Prices

In order to grow profitable vine crops, the grower must do everything possible to insure the greatest yield of early fruit at a minimum cost. The use of plant protectors or field forcers has proved a decided advantage in growing these crops.

We have tried a number of other plant protectors side by side with Hotkaps and Hotents in our melon fields but have found none which have equal ability to stand high winds and beating rains. Select the size best suited to your needs.

Germaco Hotkaps New Method of Plant Protection

beating rains and also from insects, such as the striped beetle. It also prevents the ground from baking around the plant. This makes for earlier and better fruit.

PRICES: 250 with special setter and tamper \$3.80 (weight 9 lbs.) 250 without setter and tamper \$3.40; 500 with setter and tamper \$5.75 (weight 17 lbs.) 500 without setter and tamper \$5.35; 1000 Hotkaps without setter and tamper \$10.65 (weight 26 lbs.) 5000—\$10.45 per 1000; 10,000 or more at \$10.25 per 1000. Purchaser pays transportation.

For full details and prices of Hotkaps in smaller quantities see our General Retail Catalogue.

Steel Hotkap Setter and Tamper—\$1.50 (weight 3 lbs.). Not prepaid.

Folder giving full description and direction for using Hotkaps will be sent to anyone interested on request. Please write.

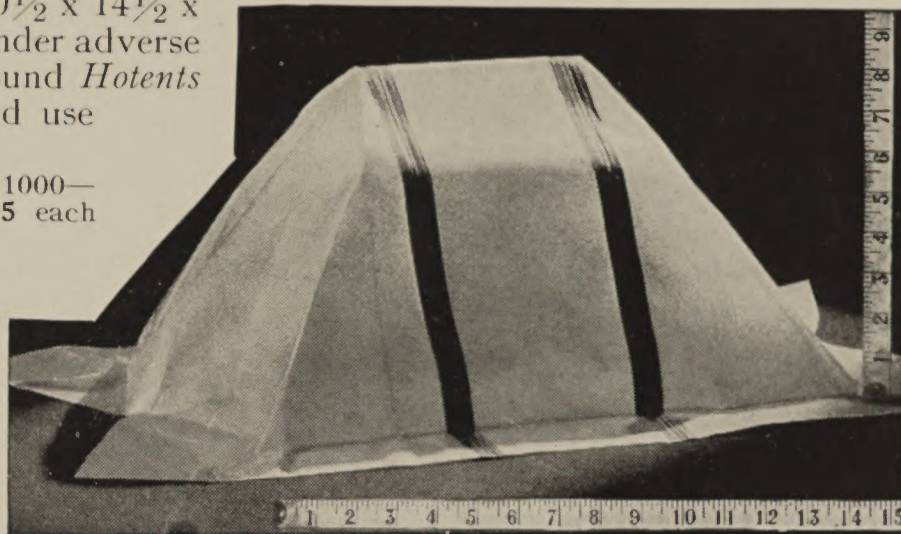

Hotents! Made by the same people. Larger area and taller, special paper, wire reinforced. 10½ x 14½ x 8½ or 152½ sq. in. at base. Will stand up under adverse conditions. Some of our customers have found Hotents especially valuable for growing melons and use many thousands each year.

PRICE: Carton, 500 (weight 34 lbs.)—\$7.50; 1000—\$13.95; 5000 at \$13.80 per thousand. Setter \$1.95 each (weight 4 lbs.). Purchaser pays transportation. We cannot sell less than 500. Send for descriptive circular.

Super Hotents. The largest practical field forcer we know. Specially made paper reinforced with wire. Size 14" x 18" by 12" high.

PRICE: 500 (weight 60 lbs.) \$10.75; 1000, \$20.25; 5000 at \$20.00 per 1000. Setter \$2.75 each. Purchaser pays transportation.

Hotkaps are simply scientifically constructed wax paper cones, which are placed over the plant or hill of seeds in the field. They act as miniature hot houses, enabling the grower to set out his plants or plant his seed as soon as the ground is warm. They afford perfect protection to the young plants from frost, wind and

New "Open Hed" Sprayer

This new Brown Sprayer represents the first real improvement that has been made in hand sprayers in many years.

It combines many new features with the well known superiority of the Brown sprayers.

Electrically welded seams, double acting pump lock, opening 5 in. in diameter. Double grip rubber pump handle. New swivel nozzle.

Write for literature.

No. 4 B. Open Hed
4 gal. Brass Tank \$11.75

No. 4 D. Open Hed
4 gal. Galvanized \$ 6.75

Transportation paid in
U. S. east of the Mississippi
River and north of Tenn.

PLANET JR. Wheel Hoes and Seeders

These are the best made and most complete line of wheelhoes and seeders, and are used by commercial growers everywhere. Prices quoted below are f. o. b. Coldwater, N.Y., Cambridge, Mass., or Philadelphia, Pa.

WHEELHOES:

Planet Jr. Double Wheelhoe No. 12.....	\$11.50
Planet Jr. Double Wheelhoe No. 13.....	8.75
Planet Jr. Single Wheelhoe No. 17.....	7.75
Planet Jr. Single Wheelhoe No. 18.....	5.75

SEEDERS and FERTILIZER DISTRIBUTORS:

Seeder No. 300. Rear wheel 11¼" diameter .	\$20.00
Seeder No. 300A. Rear wheel 9" diameter...	20.00
Fertilizer Distributor No. 219.....	9.95

Write for complete catalogue of Planet Jr. tools.

Lang's Hand Weeder

This is one of the most useful tools for hand weeding made. A boy with one of these weeders can do twice as much work in a day as he could without it.

Price: 25c each; 3 for 65c; 6 for \$1.00 postpaid.

Use "Fertile Pots" for better, earlier crops!

Seedlings set in these pots can be grown and then set in the field, pot and all without checking the plant, even in very dry weather. These pots are made with just the right amount of fertilizer for the best plant growth.

Large growers find these pots not only save time and labor but actually produce earlier fruit and better yields.

Especially valuable for Early Cabbage, Egg Plant, Peppers, Tomatoes, Melons, Squash, etc.

PRICE: Fertile Pots are packed in cartons as follows:

No. 1 (about 1½" dia.) per carton of 1000.....	\$7.50
No. 2 (about 2" dia.) per carton of 500.....	4.75
No. 3 (about 3" dia.) per carton of 335.....	4.00

We cannot sell less than single cartons of each size at above prices. Purchaser pays transportation. Weight per carton about 40 lbs. For prices of small quantities see our Retail Catalogue.
